Front:

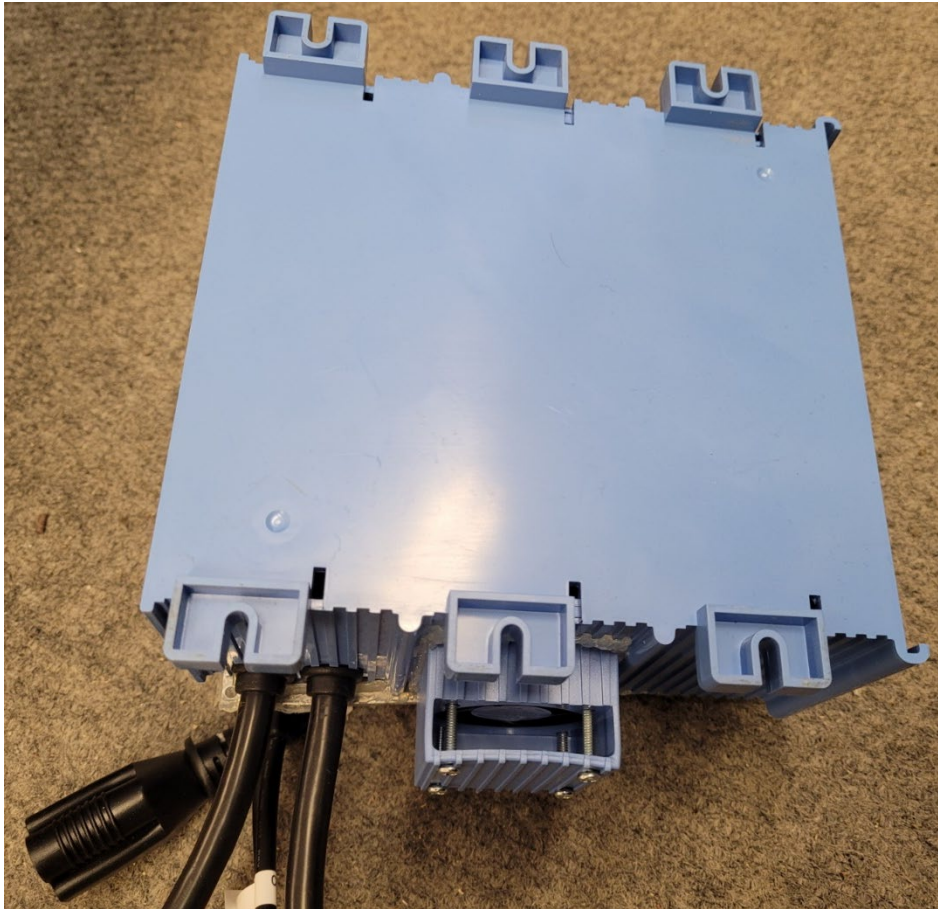

Right Side:

A photograph of a blue electronic device, possibly a power supply or amplifier, resting on a grey concrete surface. The device has a silver-colored top plate with two black knobs. Several black cables are plugged into the front panel: a large AC power cord at the top left, a standard power cord below it, and a multi-pin connector cable on the right labeled "Heater Only". A long black cable with a custom plug is also connected to the side. Small white labels with handwritten text like "LINE", "Heater Only", and "7007" are visible on some of the cables.
