TAION EX-01				DONGGUAN G.A TRADING CO.,LTD	
Product Image			Product parameter		
			constant voltage system (V)		5
			Resistance range (Ω)		2.7+0.2 Ω
			Production process		Thermal pressures
			Switch part number		K025
FUNCTION	Pressing ON/OFF button for 2seconds until the LED is red and start blinking, meanwhile the module is kept heating for 5minutes. After 5minutes heating, the LED is turned to white from blinking red automatically unless users push the button. If usrs push the button either during or after 5minutes heating time, firstly LED is turned to red is high-temperature mode, secondly LED is turned to white is mid-temperature mode. thirdly LED is turned to bule is low-temperature mode. Output Heating % of LED red blinking is 100%, LED red is also 100%, LED white is 70% and LED blue is 38%. Pressing ON/OFF button for another 2 seconds while any mode is working, it will be turned off.				
OTHERS	1. Checking the sewing process and thread ends of heating module. 2. Checking the exposuring of copper wire and damaging of each electric cables. 3. Checking the short circuit and any other defects after charging 1hour.

FCC Statement:

This device complies with Part 15 of the FCC rules. Operation is subject to the following two conditions: 1) this device may not cause harmful interference, and 2) this device must accept any interference received, including interference that may cause undesired operation.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try correct the interference by one or more of the following measures:

- Reorient the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into and outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Changes or modifications not expressly approved by the party responsible for compliance could void your authority to operate the equipment.
