

The image shows a green PCB with various electronic components. A white label is placed on the board, providing the following information:

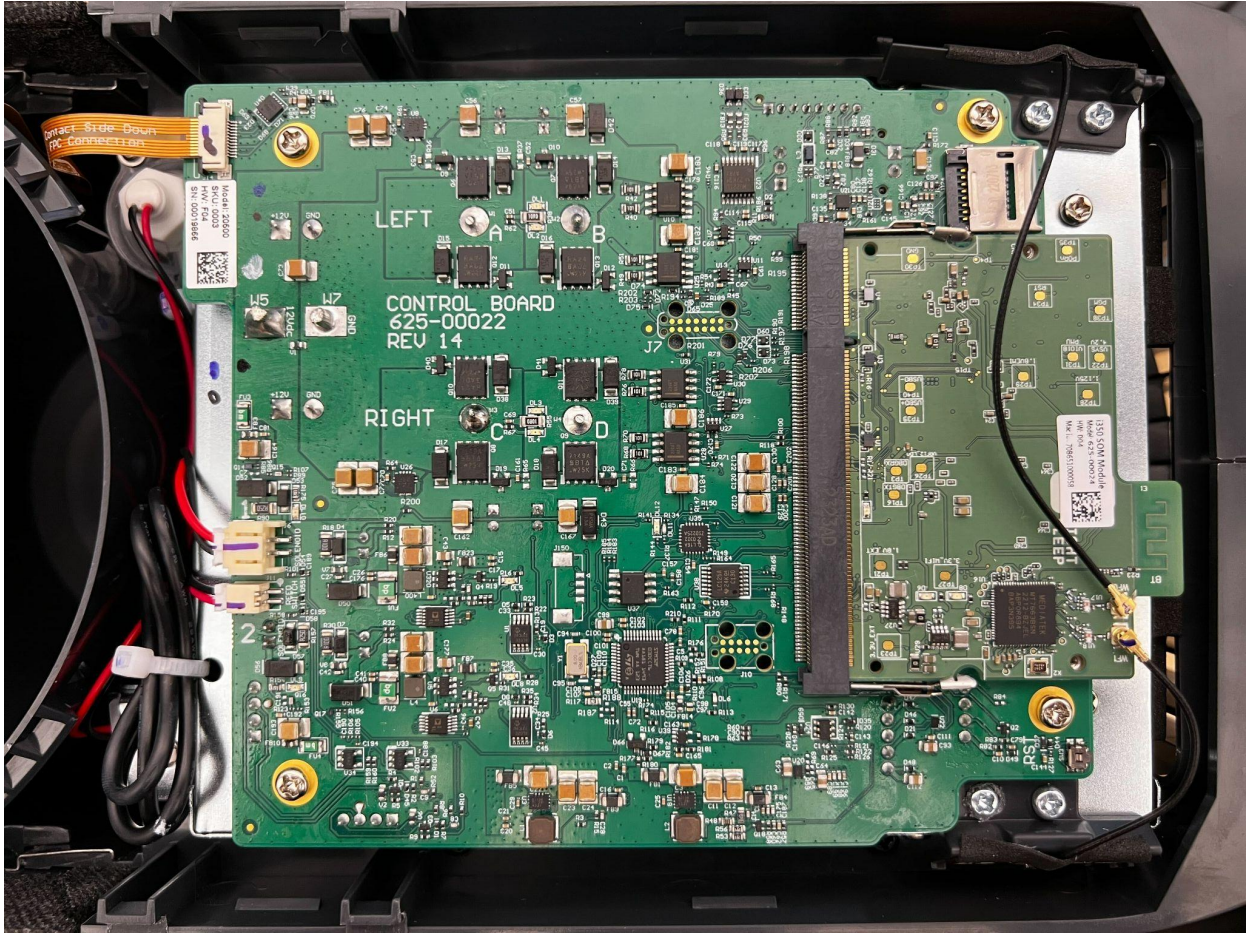

- i350 SOM Module
- Model: 625-00024
- HW: D04
- Mac L: 70B651000058

The PCB features a MediaTek MT7683B5N processor, a 256MB memory chip, and various connectors including USB, audio, and power. The board is populated with numerous surface-mount components, including capacitors, resistors, and integrated circuits. The text "EIGHT SLEEP" is visible on the right side of the board.
