

FCC Test Report

FCC ID: 2AZAM-BAC619

Original Grant

Report No. : TB-FCC178934
Applicant : TRAEGER PELLET GRILLS LLC
Equipment Under Test (EUT)
EUT Name : INDUCTION COOKTOP
Model No. : BAC619
Series Model No. : BAC619-X or BAC619-XX (Suffix X or XX can be digits or letters, will be used for customized models. These customized models will be identical with BAC619 except for functions or color in appearance.)
Brand Name : TRAEGER
Sample ID : 20201022-04-1#
Receipt Date : 2021-03-18
Test Date : 2021-03-19 to 2021-05-07
Issue Date : 2021-05-08
Standards : FCC Part 18
Conclusions : **PASS**

In the configuration tested, the EUT complied with the standards specified above,

The EUT technically complies with the FCC requirements.

Test/Witness Engineer :

Rebecca

Engineer Supervisor :

IVAN SU

Engineer Manager :

Ray Lai

This report details the results of the testing carried out on one sample. The results contained in this test report do not relate to other samples of the same product. The manufacturer should ensure that all products in series production are in conformity with the product sample detailed in the report.

TB-RF-074-1.0

Revision History

Report No.	Version	Description	Issued Date
TB-FCC178934	Rev.01	Initial issue of report	2021-05-08

1. General Information about EUT

1.1 Client Information

Applicant	:	TRAEGER PELLET GRILLS LLC
Address	:	1215 E WILMINGTON AVE SUITE 200, SALT LAKE CITY, UT 84106
Manufacturer	:	Luxine(Xi'an)Electronics Co.,LTD.
Address	:	29th, 3rd Shanglinyuan Rd, Hi-tech Development Zone, Xi'an, China

1.2 General Description of EUT (Equipment Under Test)

EUT Name	:	INDUCTION COOKTOP
Models No.	:	BAC619, BAC619-X or BAC619-XX (Suffix X or XX can be digits or letters, will be used for customized models. These customized models will be identical with BAC619 except for functions or color in appearance.)
Brand Name	:	TRAEGER
Power Supply	:	Input: AC 120V 60Hz 1410W
Working Frequency	:	20KHz~40KHz
Note: For a more detailed features description, please refer to the manufacturer's specifications or the User's Manual.		

1.3 Block Diagram Showing the Configuration of System Tested

1.4 Description of Support Units

The EUT has been tested with water up to 80% of the maximum capacity of the boiler.

1.5 Description of Test Mode

To investigate the maximum EMI emission characteristics generates from EUT, the test system was pre-scanning tested base on the consideration of the EUT operation mode, and the worst Case is when the EUT is operation with the maximum power, so the conducted and radiated emission data of below only showed the worst case.

For Conducted Test	
Final Test Mode	Description
Mode 1	Max. Power Working Mode

For Radiated Test	
Final Test Mode	Description
Mode 1	Max. Power Working Mode

1.6 Test Location

The testing report were performed by the Shenzhen Toby Technology Co., Ltd., in their facilities located at 1/F.,Building 6, Rundongsheng Industrial Zone, Longzhu, Xixiang, Bao'an District, Shenzhen, Guangdong, China. At the time of testing, the following bodies accredited the Laboratory:

CNAS (L5813)

The Laboratory has been accredited by CNAS to ISO/IEC 17025: 2017 General Requirements for the Competence of Testing and Calibration Laboratories for the competence in the field of testing. And the Registration No.: CNAS L5813.

A2LA Certificate No.: 4750.01

The laboratory has been accredited by American Association for Laboratory Accreditation(A2LA) to ISO/IEC 17025: 2017 General Requirements for the Competence of Testing and Calibration Laboratories for the technical competence in the field of Electrical Testing. And the A2LA Certificate No.: 4750.01. FCC Accredited Test Site Number: 854351. Designation Number: CN1223.

IC Registration No.: (11950A)

The Laboratory has been registered by Certification and Engineering Bureau of Industry Canada for radio equipment testing. The site registration: Site# 11950A.

2. Test Summary

FCC Part 18			
Standard Section	Test Item	Test Method	Judgment
18.305	Radiated Emission (9KHz to 30MHz)	FCC OST/MP-5:1986	PASS
18.307(a)	Conducted Emission (9KHz to 30MHz)	FCC OST/MP-5:1986	PASS
Note: N/A is an abbreviation for Not Applicable.			

3. Test Software

Test Item	Test Software	Manufacturer	Version No.
Conducted Emission	EZ-EMC	EZ	CDI-03A2
Radiation Emission	EZ-EMC	EZ	FA-03A2RE

5.3 Test Procedure

The EUT was placed 0.8 meters from the horizontal ground plane with EUT being connected to the power mains through a line impedance stabilization network (LISN). All other support equipments powered from additional LISN(s). The LISN provide 50 Ohm/ 50uH of coupling impedance for the measuring instrument.

Interconnecting cables that hang closer than 40 cm to the ground plane shall be folded back and forth in the center forming a bundle 30 to 40 cm long.

I/O cables that are not connected to a peripheral shall be bundled in the center. The end of the cable may be terminated, if required, using the correct terminating impedance. The overall length shall not exceed 1 m.

LISN at least 80 cm from the nearest part of EUT chassis.

The bandwidth of EMI test receiver is set at 9kHz, and the test frequency band is from 0.15MHz to 30MHz.

5.4 Deviation

The test is no deviation from the standard.

5.5 Test Data

Please refer to the Attachment A.

6. Radiated Emission Test

6.1 Test Standard and Limit

6.1.1 Test Standard

FCC Part 18.305

6.1.2 Test Limit

Radiated Emission Limit (9kHz~30MHz)

Frequency (MHz)	Field Strength Limit (microvolt/meter)	Measurement Distance (meters)
0.009~30	1500	30

Note: Emission Level(dBuV/m)=20log Emission Level(uV/m)

6.2 Test Setup

6.3 Test Procedure

- (1) The measuring distance of 3m shall be used for measurements at frequency up to 30MHz. The EUT was placed on a rotating 0.8m high above ground, the table was rotated 360 degrees to determine the position of the highest radiation.
- (2) An initial scan was performed in the 3m chamber using the spectrum analyzer in peak detection mode. Average measurements were conducted based on the peak sweep graph. The EUT was measured by a loop antenna.
- (3) For the actual test configuration, please see the test setup photo.

6.4 Deviation

For Radiated Emission, test at 3m distance instead of 30m distance. 40dB was plus to the limit of 30m measurement limit. More details refer to FCC part 15.31(f)(2).

6.5 Test Data

Please refer to the Attachment B.
