

ID Letter (Model difference)

FCC ID: 2AZDW-AML550 / IC: 27086-AML550

Model: AMM5500, AML550

AMM5500, AML550 has the same technical construction including circuit diagram, PCB Layout, components and component layout, all electrical construction and mechanical. The difference only the model name and sub-board (EVA board). The difference does not affect RF function.

Model Difference in Model Name as Below	
AMM5500	AML550
	
Model "AMM5500" is a combination of M.2 interface board and "AML550". This Model meets all modular approval conditions.	Model "AML550" is the model with the M.2 interface board removed from the "AMM5500". This Model also meets all modular approval conditions.
There are no differences in RF performance and characteristics between the two models.
