

## Label Placement Declaration

Product name: Wireless Earphone

Model Name: B189

FCC ID: 2AZEQ-B189L

IC: 27102-B189L

HVIN: B189L

The FCC ID&IC will not affix on the earbuds but described in the product user manual and the product package due to below reasons.

The earbud is too small to put the ID label on it.

The subject device is extremely compact, with available labeling area significantly smaller than the palm of a hand, which the FCC guidance considers too small for the required compliance statement. Due to the device's physical dimensions, it is impracticable to print the full Part 15.19(a)

Therefore, pursuant to 47 CFR § 15.19(a)(5), the required compliance statement has been placed in a prominent location within the user manual and is also printed on the product packaging

Pursuant to RSS-Gen, the label text on a device must be legible without the aid of magnification. If the device is too small to meet this condition, the label information may be included in the user manual upon agreement with ISSED.

There fore, the following labeling information has been placed in a prominent location within the user manual and will also be printed on the product packaging.

Note on Language Requirements: The user manual and all labeling information will be provided in both English and French, as required by ISSED

| ⚠ WARNING                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |                                                                                     |

dispose of the battery as a household refuse.

- The power delivered by the charger must be between min 2.5 Watts required by the radio equipment, and max 4.5 Watts in order to achieve the maximum charging speed.

**RF Exposure Information (SAR)**

Specific Absorption Rate (SAR) refers to the rate at which the body absorbs RF energy. This equipment has been tested and meets applicable limits for radio frequency (RF) exposure. During testing, device radios are set to their highest transmission levels and placed in positions that simulate use near the head, with 0 mm separation. Accessories with metal parts may change the RF performance of the device and use such accessories should be avoided. The SAR limit is 1.6 W/kg over 1 gram of tissue in US/Canada. The SAR limit of Europe is 2.0 W/kg over 10 gram of tissue.

chcete zlikvidovať.

**Frekvenčné pásmo a napájanie**

Nominálne limity pre frekvenčné pásmo a maximálny vysielač výkon (vyžarovany a/alebo prenášaný vedením) platné pre toto rádiové zariadenie sú nasledujúce:

Bluetooth (2,4 GHz): < 20 dBm

**USA/Canada Regulatory Conformance Statement**

- Remove and immediately recycle or dispose of used batteries according to local regulations and keep away from children. Do NOT dispose of batteries in household trash or incinerate.
- Do not force discharge, recharge, disassemble, heat above 35°C or incinerate. Doing so may result in injury due to venting, leakage or explosion resulting in chemical burns.
- Even used batteries may cause severe injury or death.
- The device contains non-replaceable batteries.
- Call a local poison control center for treatment information.
- The compatible battery is Rechargeable Lithium-Ion batteries.

The nominal battery voltage is 3.85V.

This device complies with part 15 of the FCC Rules and contains licence-exempt transmitter(s)/receiver(s) that comply with Innovation, Science and Economic Development Canada's licence-exempt RSS(s). Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference, and
- (2) This device must accept any interference received, including interference that may cause undesired operation.

This device has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help

Caution: Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.
