

EXHIBIT 3 - EUT INTERNAL PHOTOGRAPHS

EUT Housing and Board View 1	 A photograph showing the internal components of the EUT housing. On the left is a green printed circuit board (PCB) with a circular copper coil in the center. Several colored wires (red, black, white, yellow) are connected to the board. To the right of the PCB is a clear, circular plastic housing with a black circular component in the center. A black ruler with white markings is placed below the components for scale.
Solder Board-Component View 1	 A close-up photograph of the solder board-component view. It shows various electronic components on a green PCB, including capacitors, resistors, and integrated circuits. Two orange electrolytic capacitors are prominent on the right side. A black ruler with white markings is placed below the components for scale.

Solder Board-Component View 2	 A photograph of a green printed circuit board (PCB) with various electronic components. A large yellow rectangular component is prominent in the center. The board is populated with numerous small surface-mount components, including resistors, capacitors, and integrated circuits. Two blue wires are connected to the left side of the board. A black ruler with white markings is placed below the board for scale, showing measurements in millimeters.
Solder Board-Component View 3	 A photograph of a green printed circuit board (PCB) with various electronic components. Two large white rectangular components are visible. The board is populated with numerous small surface-mount components, including resistors, capacitors, and integrated circuits. A black USB cable is connected to the right side of the board. A black ruler with white markings is placed below the board for scale, showing measurements in millimeters. Text on the board includes "USB HOLDER", "Version V6", "JR19104W", and "29985.0236R".

Solder Board-Component View 4	 A photograph of a green printed circuit board (PCB) component, labeled '4', positioned next to a black ruler with white markings. The component features a large silver-colored heat sink on the left side, a central integrated circuit (IC) labeled '12V', and various other components including resistors and capacitors. Two red wires are connected to the board. The ruler shows measurements in millimeters, with the component spanning approximately 40 mm in width and 20 mm in height.
Solder Board-Component View 5	 A photograph of a yellow printed circuit board (PCB) component, labeled '5', positioned next to a black ruler with white markings. The component is rectangular and features two black integrated circuits (ICs) on the left side, a central circular component, and two red wires connected to the top. The ruler shows measurements in millimeters, with the component spanning approximately 40 mm in width and 10 mm in height.

Solder Board-Component View 6	 A photograph of a small, rectangular green printed circuit board (PCB) component. The board is populated with several surface-mount components, including a small integrated circuit (IC) and several resistors. Two thin wires, one red and one black, are soldered to the top of the board. The component is placed on a black surface with a white ruler for scale. The ruler shows measurements in millimeters, with the component spanning approximately 20 mm in width and 10 mm in height. Text on the board includes "LSB HOLDING 331983A Y15-200807" and "Version V1".
Solder Board-Component View 7	 A photograph of a larger, irregularly shaped green printed circuit board (PCB) component. The board is populated with numerous surface-mount components, including several integrated circuits (ICs), resistors, and capacitors. A red wire is soldered to the top of the board. The component is placed on a black surface with a white ruler for scale. The ruler shows measurements in millimeters, with the component spanning approximately 100 mm in width and 80 mm in height. Text on the board includes "25985-0280R", "200528 U2.0", and "U21".

Solder Board-Component View 8	 A photograph of a green, irregularly shaped printed circuit board (PCB) with various electronic components soldered onto it. The board is placed on a black surface with a white ruler for scale. The ruler shows measurements in millimeters, with the top edge marked from 0 to 80 mm and the bottom edge marked from 0 to 100 mm. A red wire is connected to one of the components on the board.
Solder Board-Component View 9	 A photograph of a rectangular green printed circuit board (PCB) populated with numerous surface-mount components, including integrated circuits, resistors, and capacitors. The board is positioned on a black background with a white ruler for scale. The ruler has markings in millimeters, with the left edge showing 0 to 90 mm and the bottom edge showing 0 to 100 mm. A red wire is attached to the right side of the board.

Solder Board-Component View 10	 A photograph of a green printed circuit board (PCB) component, likely a solder mask or a small board, placed on a black surface with a white ruler. The ruler shows measurements in millimeters (0 to 100 mm) and centimeters (0 to 10 cm). The PCB has a red component (possibly a capacitor or resistor) and a red wire connected to it. The board is positioned vertically, with the ruler placed horizontally next to it.
Antenna View	Wireless Charger Antenna  A photograph showing the underside of a circular device, likely a wireless charger, with a green PCB and a circular antenna coil. The coil is made of copper wire and is connected to a yellow cable. The device is placed on a black surface with a white ruler. The ruler shows measurements in millimeters (0 to 100 mm) and centimeters (0 to 10 cm). The device is positioned vertically, with the ruler placed horizontally next to it.
