

EXHIBIT 3 - EUT INTERNAL PHOTOGRAPHS

EUT Housing and Board View 1	 A photograph showing the back of a black mobile phone housing and a blue back cover. The black housing has a battery compartment with 'HYUNDAI' printed on it. The blue cover has a speaker grille and a camera lens. A black ruler with white markings is placed below the components for scale.
EUT Housing and Board View 2	 A photograph showing the internal components of the mobile phone. The black housing is open, revealing the internal circuit board and a SIM card slot. A black battery with 'HYUNDAI' printed on it is placed next to the housing. The blue back cover is also visible. A black ruler with white markings is placed below the components for scale.

EUT Housing and Board View 3	 A photograph showing the internal components of a mobile phone, specifically the battery and the main circuit board. The battery is a large, white, rectangular unit. The circuit board is green and populated with various electronic components, including a large black integrated circuit (likely a processor or memory chip) and several smaller components. The phone's black plastic housing is visible around the edges. A blue ruler is placed horizontally below the phone, showing measurements in millimeters. The background is a blue textured surface.
EUT Housing and Board View 4	 A photograph showing the back of the mobile phone's housing. The housing is black plastic. A large, white, rectangular battery is visible, secured with a metal bracket. The main circuit board is visible through a transparent window in the center of the housing. The board is green and populated with various electronic components, including a large black integrated circuit (likely a processor or memory chip) and several smaller components. A blue ruler is placed horizontally below the phone, showing measurements in millimeters. The background is a blue textured surface.

Solder Board-Component View 1	 A photograph of a green printed circuit board (PCB) assembly, labeled 'Solder Board-Component View 1'. The board is oriented vertically and features a black circular component at the top, several silver-colored rectangular components in the middle, and various electronic components at the bottom. It is placed on a blue textured surface next to a black ruler with white markings in millimeters. The ruler shows measurements from 0 to 100 mm.
Solder Board-Component View 2	 A photograph of a green printed circuit board (PCB) assembly, labeled 'Solder Board-Component View 2'. The board is oriented vertically and features a black rectangular component at the top, several silver-colored rectangular components in the middle, and various electronic components at the bottom. It is placed on a blue textured surface next to a black ruler with white markings in millimeters. The ruler shows measurements from 0 to 100 mm.

Solder Board-Component View 3	 A photograph of a green printed circuit board (PCB) component, labeled '3', positioned vertically against a blue background. The component features several white rectangular pads and a small orange ribbon cable attached to its top. A black ruler with white markings is placed horizontally below the component, showing measurements in millimeters.
Solder Board-Component View 4	 A photograph of a green printed circuit board (PCB) component, labeled '4', positioned vertically against a blue background. The component features several white rectangular pads and a small orange ribbon cable attached to its top. A black ruler with white markings is placed horizontally below the component, showing measurements in millimeters.

Solder Board-Component View 5	 A photograph of a green printed circuit board (PCB) component, labeled '5', showing its solder side. The board is populated with numerous circular solder pads and a central integrated circuit. It is positioned next to a black ruler with white markings for scale, set against a blue textured background.
Solder Board-Component View 6	 A photograph of the same green PCB component, labeled '6', showing its opposite side. This view reveals various electronic components including integrated circuits, capacitors, and connectors. A black ruler with white markings is placed alongside the board for scale, with a blue textured background.
