

EXHIBIT 3 - EUT INTERNAL PHOTOGRAPHS

EUT Housing and Board View 1	 A photograph showing the disassembled components of an Electronic Under Test (EUT). On the left is the main assembly with a black top cap, a purple component, and a green PCB with wires. To its right are the black top cap and the green PCB. A black ruler with white markings is placed vertically and horizontally for scale. The background is a blue textured surface.
Solder Board-Component View 1	 A close-up photograph of the green PCB. The board features various electronic components, including a large black integrated circuit, resistors, and capacitors. Four circular mounting holes are visible. A black ruler with white markings is placed vertically and horizontally for scale. The background is a blue textured surface.

Solder Board-Component View 2	 A photograph of a circular green printed circuit board (PCB) component. The board is positioned on a blue textured surface. A black ruler with white markings is placed to the left and bottom of the component for scale. The ruler shows measurements in millimeters, with the vertical scale on the left ranging from 0 to 100 mm and the horizontal scale at the bottom ranging from 0 to 100 mm. The PCB has several small components, including a central square chip, and some text printed on it: "HYDROFLOW", "RangeExtender Rev. A", and "Design By Zero Byte LLC".
Solder Board-Component View 3	 A photograph of the same circular green PCB component from a different angle. The board is on the same blue textured surface. A black ruler with white markings is placed to the left and bottom of the component. The vertical scale on the left ranges from 0 to 100 mm, and the horizontal scale at the bottom ranges from 0 to 100 mm. This view shows more detail of the components on the board, including a central square chip and various smaller components and solder joints.

Solder Board-Component View 4	 A circular green printed circuit board (PCB) component is shown against a blue background. The component has several small electronic components soldered onto it, including what appears to be a microcontroller or IC. A black ruler with white markings is placed below the component for scale, showing measurements in millimeters (mm) and centimeters (cm).
Solder Board-Component View 5	 A rectangular silver-colored battery component is shown against a blue background. A red and black cable is attached to the battery. The battery has some text printed on it, including "L3 503035" and "200mAh 3.7V". A black ruler with white markings is placed below the component for scale, showing measurements in millimeters (mm) and centimeters (cm).

Solder Board-Component View 6	 A photograph showing a small, rectangular, silver-colored component with a yellow solder mask, mounted on a blue PCB. The component is connected to a red wire. A black ruler with white markings is placed below the component for scale. The ruler shows measurements in millimeters (0 to 100 mm) and centimeters (0 to 10 cm).
Antenna View	 A photograph showing a green circular PCB with various electronic components, including a microcontroller, capacitors, and a small antenna. A red box highlights the antenna area, and a red line points to it from a label "BT Antenna". A black ruler with white markings is placed below the component for scale. The ruler shows measurements in millimeters (0 to 100 mm) and centimeters (0 to 10 cm).
