

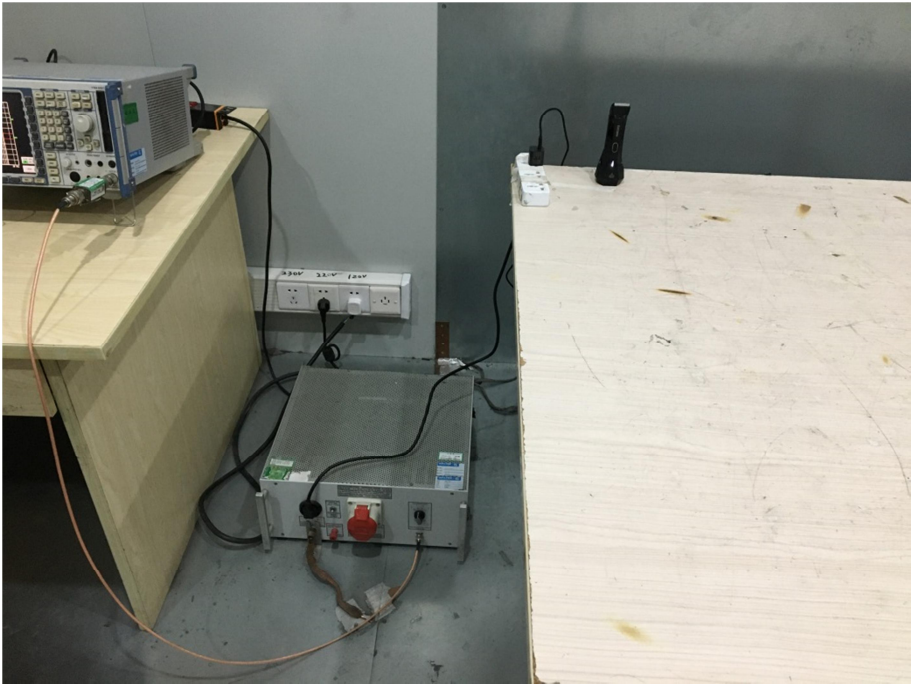

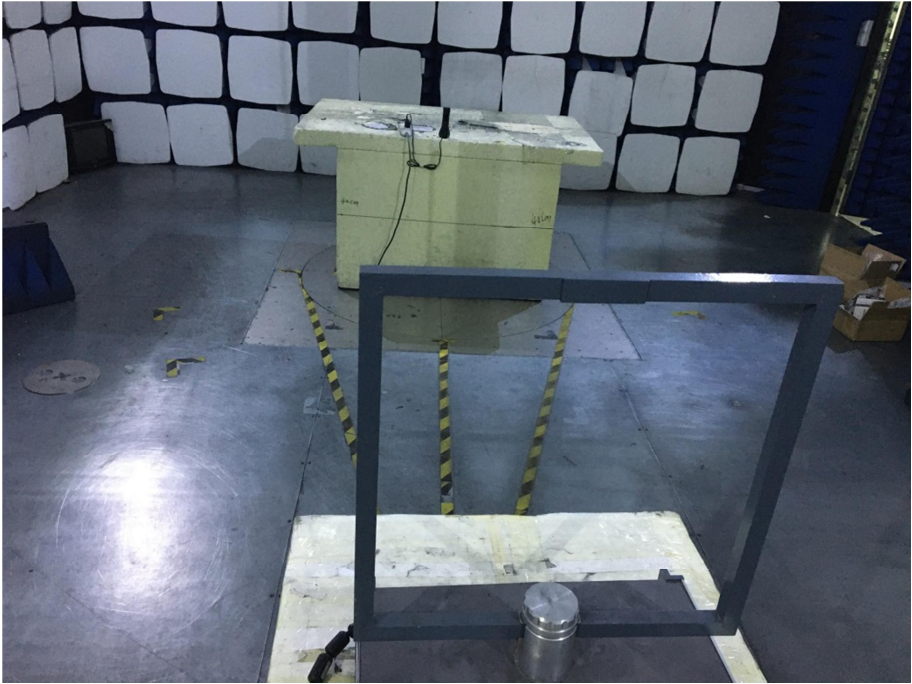

EXHIBIT 4 - TEST SETUP PHOTOGRAPHS

Conducted Emission Test Setup	 A photograph showing the setup for a conducted emission test. On the left, a piece of electronic equipment, likely a spectrum analyzer or a noise meter, sits on a light-colored wooden workbench. A red cable is connected to the equipment. To the right of the workbench, on the floor, is a large, rectangular, silver-colored metal enclosure, possibly a power supply or a filter. It has a red emergency stop button and various cables connected to it. The background is a plain, light-colored wall.
Radiation Emission View (Below 30MHz)	 A photograph showing the setup for a radiation emission test. In the center, a yellow cardboard box is placed on a wooden pallet. A blue metal frame is positioned in front of the box. The floor is dark and reflective. The background is a wall covered with white, rectangular, foam-like material, likely for shielding or absorption. A yellow and black striped caution tape is visible on the floor.
