WOLONOW Smart Body Fat Scale Pro User Guide

Please read through the user guide before using the product and keep it in good condition

Warning: This product must not be used by:

- Patients with a cardiac pacemaker or special population who have other electronic product to maintain their vital signs in their body. When this product is used to measure BMI, weak current flows through the human body, which current may affect the proper operation of the medical apparatus inside the body and lead to a severe consequence.
- Pregnant women. Those pregnant women who need to use this product should seek for their doctor's advice first.
- This product should not be used on an unstable or slippery surface to avoid falling.

Note: The device may not be able to obtain precise body data from the following people due to their special nature. Only the body weight information can be accurate.

- Children in growth stage
- Osteoporosis patients
- Elderly people
- Professional athletes
- Edema patients
- Patients with cold or fever
- Pregnant women
- Patients with dialysis

Please try to avoid measuring your weight if:

- The environment is humid, the scale surface is slippery or the product is not steady
- You have just finish sauna and shower and your body surface is not completely dry
- You have just finish intense exercises and your body is not completely quiet down
- You have just drunk a large volume of water or you have just eaten
- You have drunk a large volume of alcohol

Before measuring your weight:

- Turn on or restart the scale and wait for the "❤️" icon stops flashing on the scale surface.
- Keep the scale static for 5 to 10 seconds for the first time use or after moving the scale to allow calibration of the sensor with the ground.

Maintenance and Care

- Please use clean wet cloth to wipe to clean the scale surface.
- Please do not use any detergent to clean the scale surface. Corrosive detergents may cause damage to the ITO conductive coating and affect the precision in body fat measurement. "ITO coating is used with the body fat measurement chip to measure your body fat"

Product Description

Thank you for choosing WOLONOW Smart Body Fat Scale

Hidden High-Resolution LED Screen

Scale Leg with High-Precision Sensor

Imperceptible ITO Coating

FCC Requirement

FCC ID: 2AZSZ-IT0300

changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) this device may not cause harmful interference, and

(2) this device must accept any interference received, including interference that may cause undesired operation.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates, uses, and can radiate radio frequency energy, and if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Basic Parameters

Product Name: WOLONOW Smart Body Fat Scale Pro

Model: BFSITO - 300

Unit of Measurement: lb, kg

Communication Mode: Bluetooth 4.0

Dimensions: 312 x 312 x21 (mm)

Execution Standard: Q/XF 001-2021

Battery Type: 400mAh Lithium Battery

Input Voltage: DC 5V

Net Weight: 1.53 kg

Weight Range: 5kg - 150kg

Measurement Precision: ±50g

Operating Ambient Temperature: - 5°C to 40°C

Enclosure Material: ABS engineering plastics

Charging Requirement: DC 5V, 0.4A

Input Current 0.5A
