

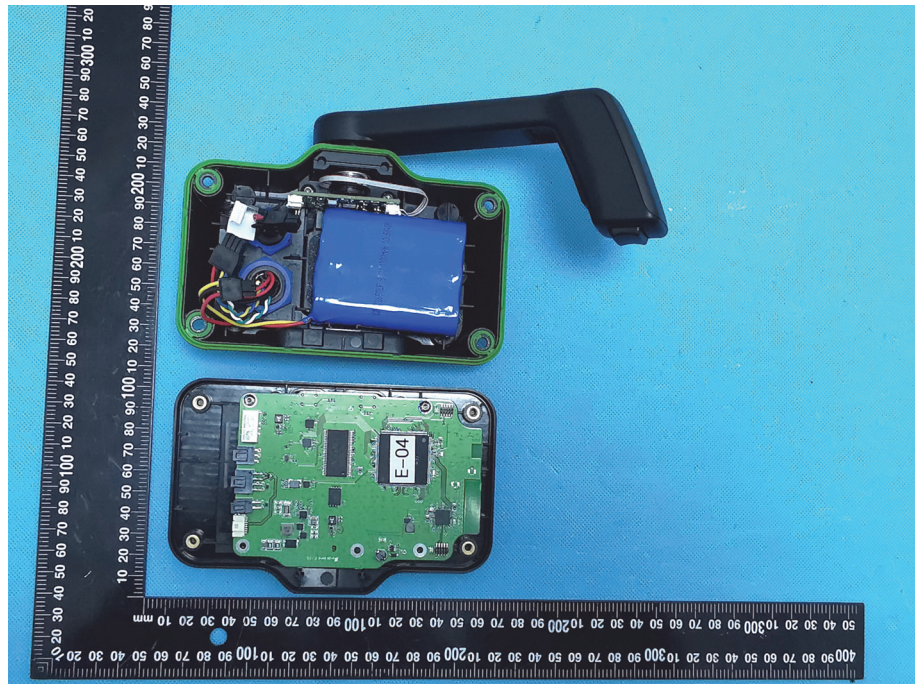

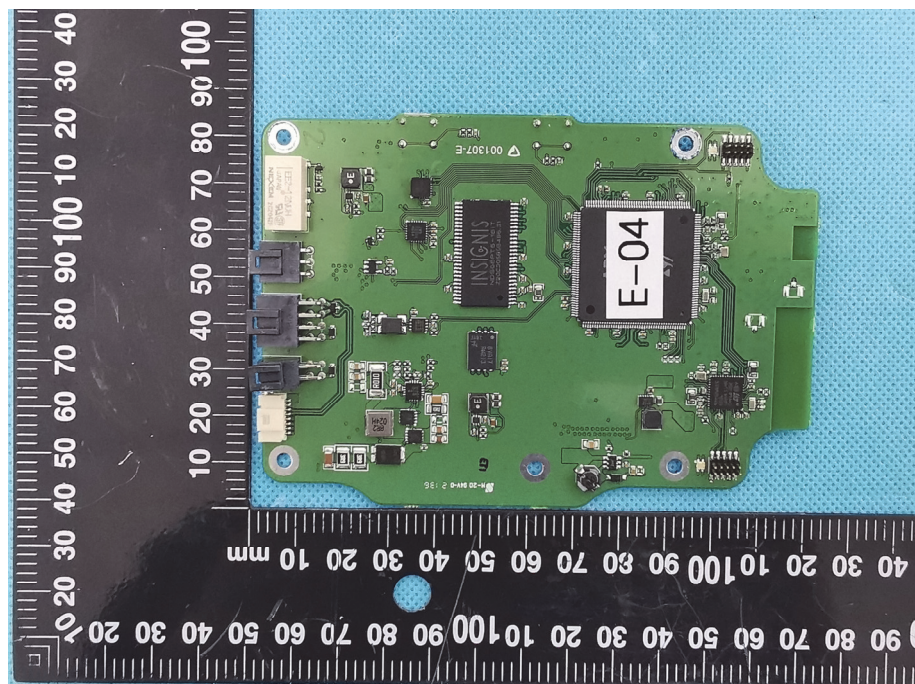

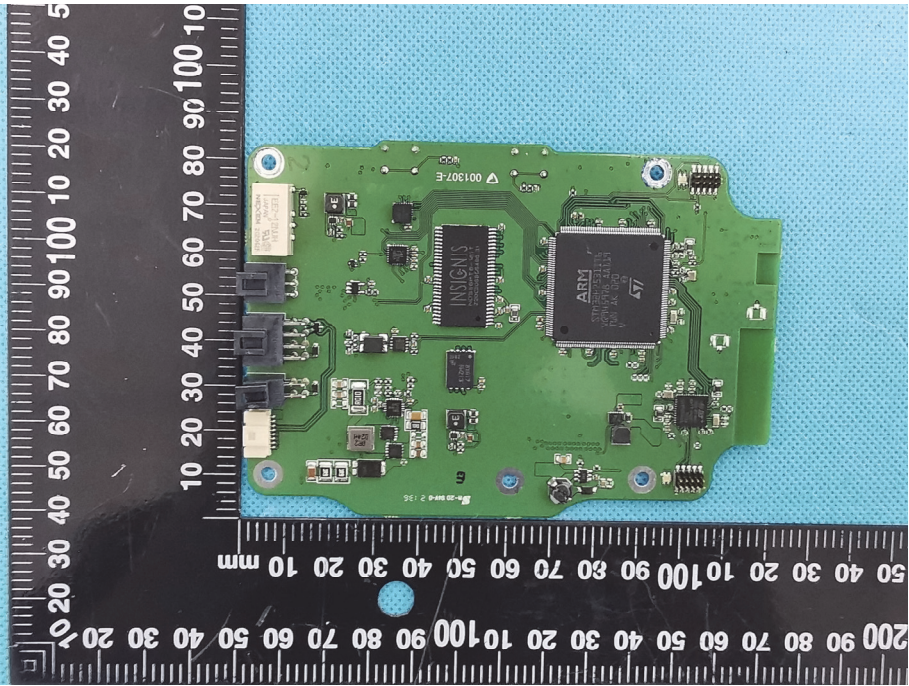

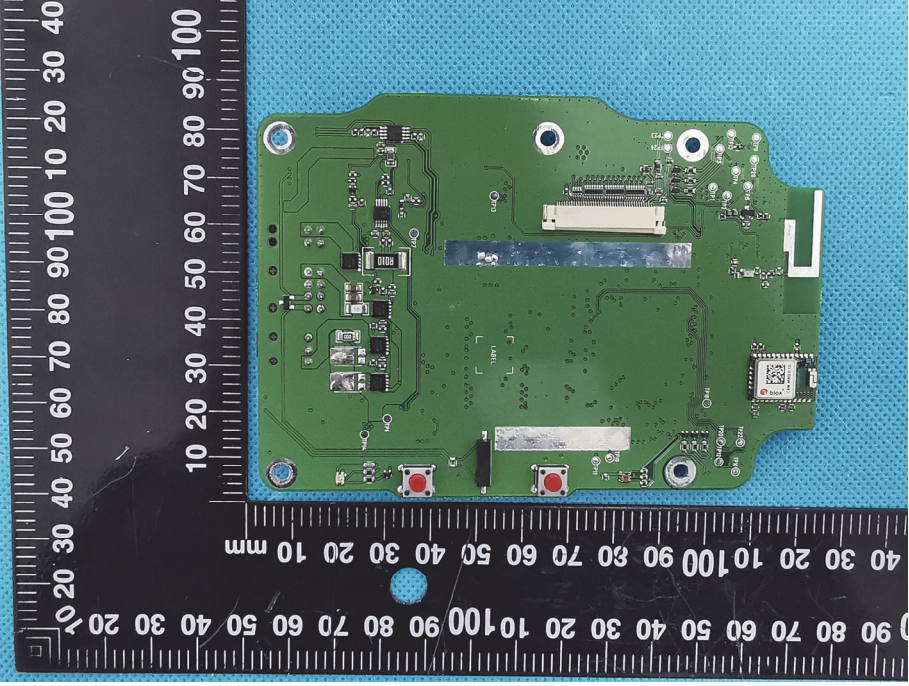

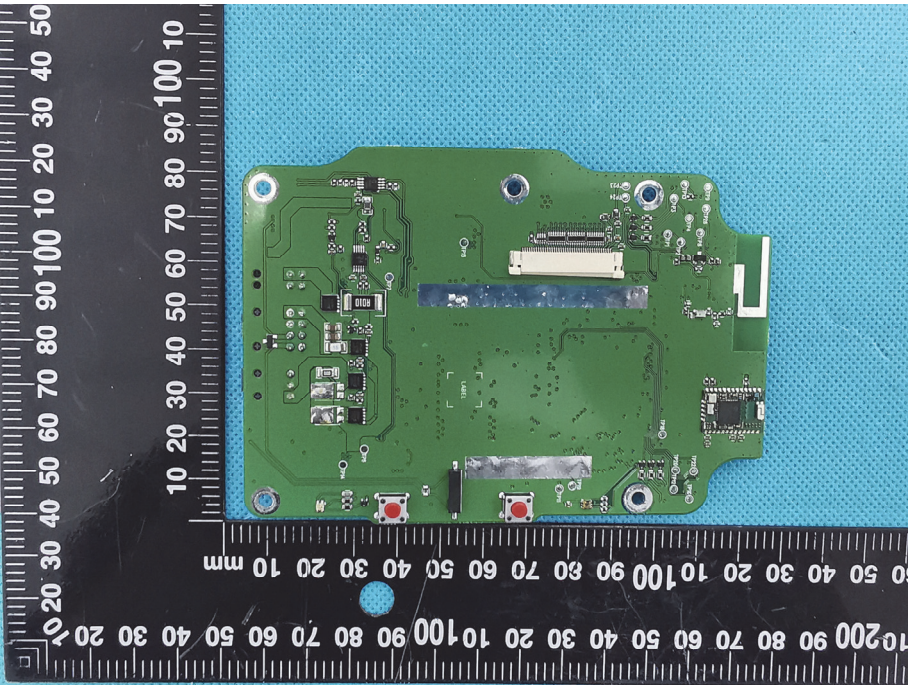

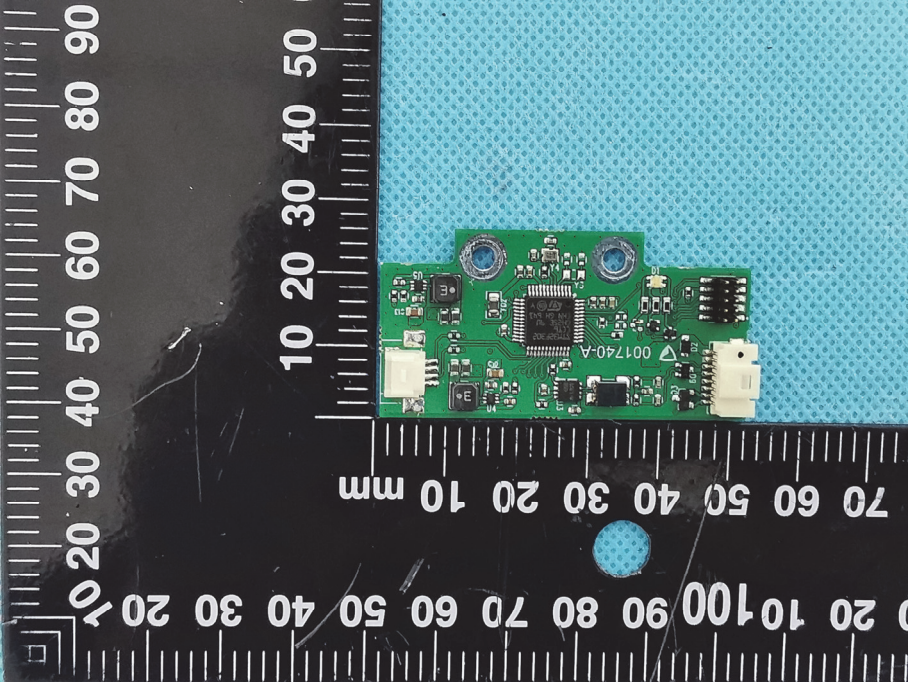

EXHIBIT 3 - EUT INTERNAL PHOTOGRAPHS**EUT Housing and Board
View 1****Solder
Board-Component View
1**

Solder Board-Component View 2	 A photograph of a green printed circuit board (PCB) with various electronic components. The board is positioned on a blue textured surface. A black ruler with white markings is placed horizontally below the board, showing measurements in millimeters (0 to 100 mm) and centimeters (0 to 10 cm). The board features a large black integrated circuit (IC) labeled 'ARM' and 'Cortex-A7', a smaller black IC labeled 'INSIGNIS', and several other smaller components, including capacitors and resistors. The board has a complex shape with multiple mounting holes and connectors.
Solder Board-Component View 3	 A photograph of the same green PCB from a different perspective. The board is positioned on a blue textured surface. A black ruler with white markings is placed horizontally below the board, showing measurements in millimeters (0 to 100 mm) and centimeters (0 to 10 cm). The board features a large black integrated circuit (IC) labeled 'ARM' and 'Cortex-A7', a smaller black IC labeled 'INSIGNIS', and several other smaller components, including capacitors and resistors. The board has a complex shape with multiple mounting holes and connectors.

Solder Board-Component View 4	 A photograph of a green printed circuit board (PCB) with various electronic components, including integrated circuits, capacitors, and resistors. The board is positioned on a blue textured surface. A black ruler with white markings is placed horizontally below the board, showing measurements in millimeters. The ruler has two scales: one from 0 to 100 mm and another from 0 to 200 mm.
Solder Board-Component View 5	 A photograph of a smaller green printed circuit board (PCB) with electronic components, including a central integrated circuit and several capacitors. The board is positioned on a blue textured surface. A black ruler with white markings is placed horizontally below the board, showing measurements in millimeters. The ruler has two scales: one from 0 to 100 mm and another from 0 to 200 mm.
