ANRAN App installation and Setup

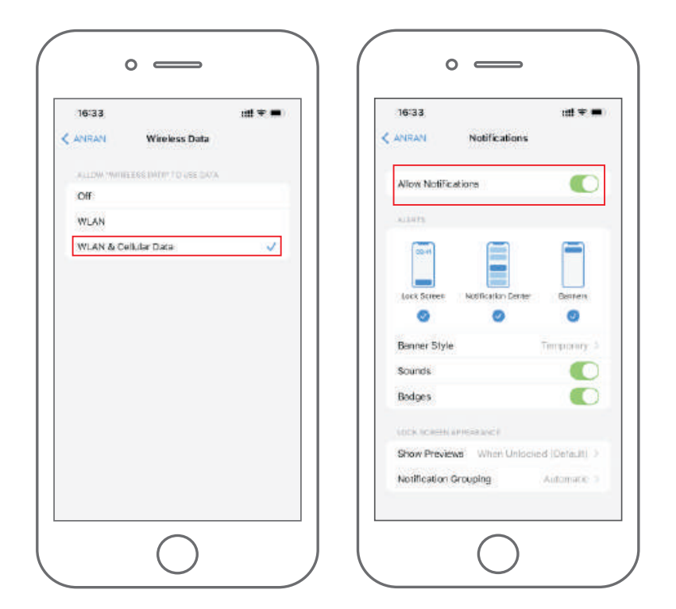
Search "ANRAN" on apple store or google play to download the app.

- from Google Play
- from Apple Store
- or Scan the following QR code

Available on the App Store
ANDROID APP ON Google play

Download App (IOS & android)

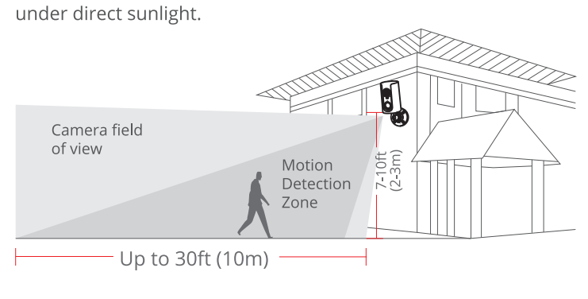
TIPS: APP Permission Settings
When using the application for the first time, please turn on the following 2 permissions.
1) Allow"ANRAN"to access mobile cellular data and WLAN, otherwise you will not be able to add devices.
2) Allow "ANRAN" to receive messages, otherwise the phone will not receive alert push notifications when motion detection or audible alerts are triggered.
The following is a screenshot of iOS cellphone operation, Android cell phone permissions open method is basically the same as this method.



Mounting the camera

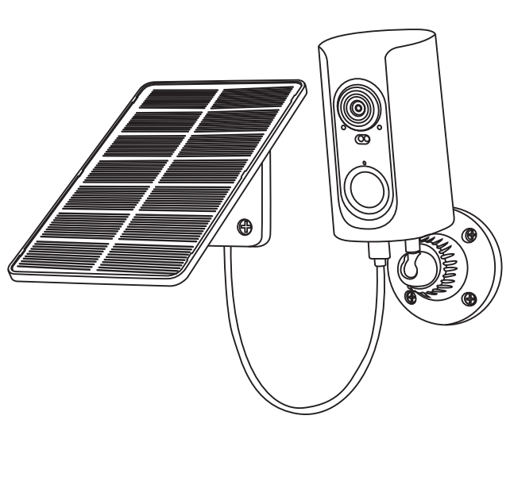
Select Height and location

Hang the camera 7-10 ft (2-3 m) above the ground. This height maximizes the detection range of the motion sensor of the camera. Avoid placing the camera under direct sunlight.



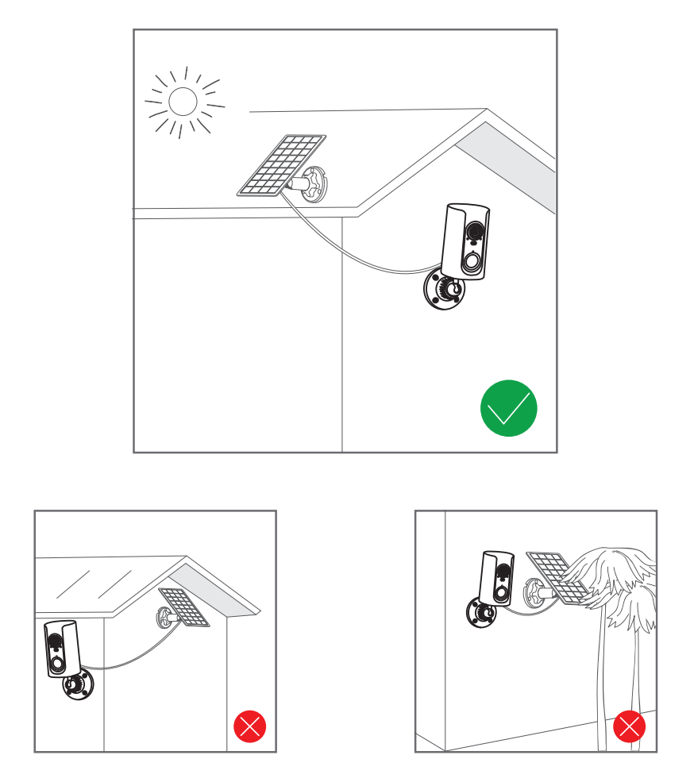
Installation instruction of solar panel

1. keep the installation angle of solar panels about 30-45° with the horizontal plane, as shown in the picture below.
2. The installation between the solar panel and the camera is shown in the following figure.



Tips for the installation of solar panel

1. When installing in the northern hemisphere, face the panel to the south, and when installing in the southern hemisphere, face the panel to the north.
2. Take care to install the solar panel so that the sun is not blocked by any items such as eaves, trees branches, etc.



Register an account

1. Open the APP to sign up an account. Go to the login interface, and click “Sign Up”.
2. Sign up with your email address, and click “Next”.
3. Set up an “Nickname” and “Password” for your APP, click "Done" to complete.

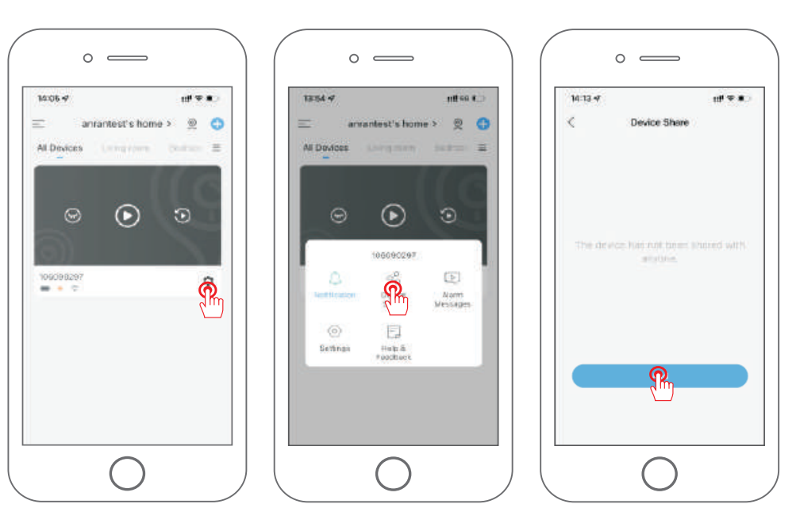
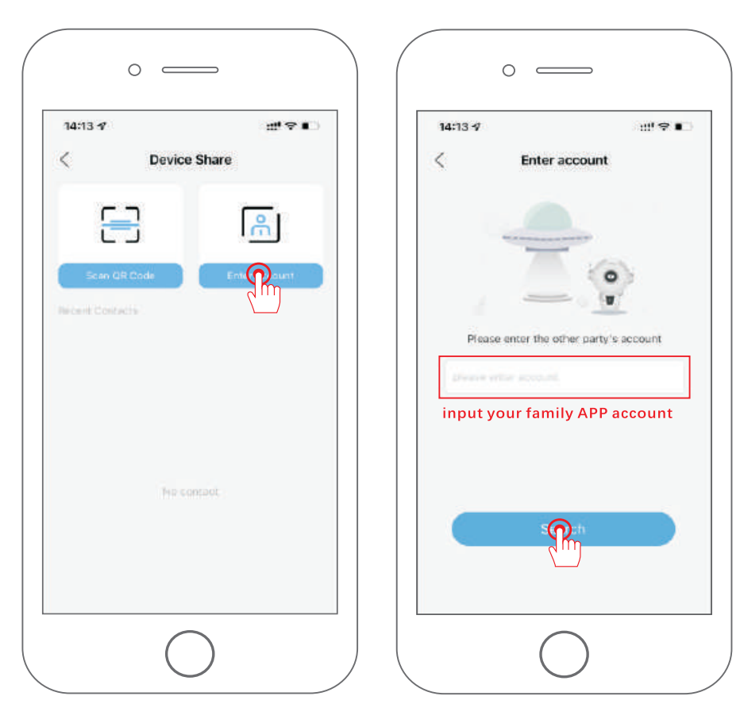
TIPS: when your family register app account, the country selected during registration must be the same as you choose.





Device Share
Scan QR Code
Enter account
Please enter the other party's account
input your family APP account

FAQ

Q: The device cannot be previewed properly?
A: Check whether the SIM card is normal. For example, whether the card is in arrears, whether the Mobile traffic is used up, whether the card is inserted in place, whether the card is damaged, or whether the local position covers 4G Internet. If SIM card is ok, it is recommended to reset the device and add it again.

Q: Why is it still in the list of devices after reseting?
A: The device reseting can only reset the parameter configurations of the camera, but cannot change the App configuration. When you want to remove the camera, you have to do the deletion by the App.

Q: Why the device doesn't indentify the SD card?
A: It is recommended to plug in SD card after power cut. Confirm whether the SD card is normal and the format is FAT32. And the TF card may not be identified when the Internet environment is not good.

Q: Why the device doesn't indentify the SIM card?
A: Check whether the SIM card is normal. For example, whether the card is in arrears, whether the flow is used up, whether the card is inserted in place, whether the card is damaged, or whether the local position covers 4G Internet.

Q: Why I can’t get the notifications with my cell phone App?
A: Please confirm that the App has been running on the phone, and the relevant reminder function on App has been opened. And the message notification and authority confirmation in the mobile phone system have been opened.

FCC Warning Statement

Changes or modifications not expressly approved by the party responsible for compliance could void the user’s authority to operate the equipment. This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
-- Reorient or relocate the receiving antenna.
-- Increase the separation between the equipment and receiver.
-- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
-- Consult the dealer or an experienced radio/TV technician for help.
This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:
(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.
RF Exposure Statement
To maintain compliance with FCC's RF Exposure guidelines, This equipment should be installed and operated with minimum distance of 20cm the radiator your body. This device and its antenna(s) must not be co-located or operation in conjunction with any other antenna or transmitter.
