## Q78 Karaoke Microphone

Please read the instruction carefully before you use the microphone

### STRUCTURE

### INSTRUCTIONS

#### HOW TO USE

- Switch on/off**  
Press the power button for 2-3s, the blue light will be on/off.
- Connect Bluetooth**  
Turn on Bluetooth on your phone, and search the bluetooth name"Q78", click and pair. The microphone will tick sound.  
\*Note that the microphone's light flash frequency depends on the music's volume input. The louder the sound, the faster the light flickers

- Play Music**  
Turn on any music app on your phone, and play songs you like. Music volume could be adjusted by cellphone or on the microphone side.
- Control Volume**  
Adjust Voice volume and echo volume sliders to a suitable place.Start listening and singing.

### FAQS

| Trouble                                  | Reason                                                                                 | Solution                                                                      |
|------------------------------------------|----------------------------------------------------------------------------------------|-------------------------------------------------------------------------------|
| The power light is not on                | Low battery power, or the charging cable is not plugged properly when charging         | Go to charge, and check if the power connector & charging cable connects well |
| Microphone no or low sound               | The machine is not powered on or the mic and echo volume are not turned up             | Restart the mic first and turn up both mic and echo volume                    |
| No reverberation                         | The echo volume is not turned up                                                       | Adjust the echo volume slider                                                 |
| There is noise when singing or recording | Environmental noise                                                                    | Use in a quiet place                                                          |
|                                          | Phone signal interference                                                              | Put more distance between the mic and your phone                              |
| Some phones don't record well            | Music software setup problem                                                           | Lower the mic volume                                                          |
|                                          | The phone model doesn't match, or the voice processing chips in mobile phones are weak | Restart or replace other apps/phones to try again                             |

|                                               |                                                                                                          |                                                                 |
|-----------------------------------------------|----------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------|
| Sound interrupts when playing Bluetooth music | The Bluetooth device is too far away from the mic, or there is an obstacle between the phone and the mic | Stay close to the phone and avoid obstacles                     |
| Bluetooth music is low or no sound            | Phone volume low or your source music files low                                                          | Turn up phone volume or download music files with a high volume |
| Bluetooth can't be connected                  | Bluetooth device is too far away                                                                         | Get closer to the phone                                         |
|                                               | There is an obstacle                                                                                     | Avoid obstacles                                                 |
| Bluetooth music is distorted                  | With Bluetooth memory , already paired to other phones                                                   | Disconnect the Bluetooth with previous phones                   |
|                                               | The volume is too large                                                                                  | Turn down the volume of media music                             |
|                                               | Battery power in low                                                                                     | Go to charge                                                    |

### HOW TO CHARGE

- When the battery power is too low, the microphone will automatically shut down;
- Use the included USB cable to connect with your phone's standard charger 5V, the red light shows charging; the red light is off when charging completed.

### ISED CANADA STATEMENT

This device contains licence-exempt trasnsmitter(s)/receiv-er(s) that comply with Innovation, Science and Economic Development Canada 's licence-exempt RSS(s). Operation is subject to the following two conditions:

- this device may not cause interference and
- this device must accept any interference, including interference that may cause undesired operation of the device.

Radiation Exposure: This equipment complies with Canada radiation exposure limits set forth for an uncontrolled environment

RF Exposure Statement  
To maintain compliance with IC's RF Exposure guidelines, The installation and operation of the device should meet the requirements for portable devices. This device and its antenna(s) must not be co-located or operation in conjunction with any other antenna or transmitter

### DÉCLARATION DU CANADA

Ce dispositif contient des transmetteurs/récepteurs trasnsmitters exemptés de licence qui sont conformes à l'innovation, à la Science et au développement économique Les flux RSS du Canada exempts de licences. L'exploita-tion est soumise aux deux conditions suivantes:

- cet appareil ne doit pas causer d'interférences et
- ce dispositif doit accepter toute interférence, y compris toute interférence pouvant entraîner un fonctionnement indésirable du dispositif.

Exposition au rayonnement: cet équipement est conforme aux limites d'exposition au rayonnement établies par le Canada pour un environnement non contrôlé

Déclaration d'exposition aux RF  
Pour rester en conformité avec les lignes directrices d'exposition RF d'IC, Cet équipement doit être installé et actionné conformément aux exigences de l'équipement portable. Ce dispositif et ses antennes ne doivent pas être co-localisés ni fonctionner en conjonction avec une autre antenne ou un autre émetteur

### FCC WARNING STATEMENT

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment. This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference, and
- (2) this device must accept any interference received, including interference that may cause undesired operation.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.

### SPECIFICATION

|                              |                          |
|------------------------------|--------------------------|
| Microphone                   | Capacitance              |
| Output power                 | 5W                       |
| Frequency Range              | 100Hz-10KHz              |
| Maximum sound pressure level | >115dB 1KHz THD<1%       |
| Reverb Mode                  | Echo sound reverberation |
| Charging Voltage             | DC 5V, 1A                |
