actto

Retro 2 Mini Bluetooth Keyboard
Model:B307, B309

Connect up to 4 devices

The mode switch (**up** above,**you** to connect up to four devices. (Wired mode / Bluetooth mode(CH 1-3 channel)

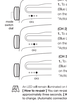
- **Wired mode (1 device)**
  USB to C cable (Green LED)
- **Bluetooth mode (3 devices)**
  Bluetooth CH 1 (Blue LED)
  Bluetooth CH 2 (Blue LED)
  Bluetooth CH 3 (Blue LED)

Wired mode connection method (USB to C cable)

1. You can select the wired mode by rotating the mode switch dial. (Green LED lights up).
2. Use the C-type cable provided to connect the keyboard to a computer. It will turn on automatically. Upon completion of the settings, you can start using it immediately.

English

Bluetooth connection method (3 devices connected)



(CH 1) Connecting to the first Bluetooth device
1. Rotate the mode switch dial to the Bluetooth mode switch (1st (Blue LED blinking / ready to pair). 2. Activate the Bluetooth function on the device to be connected, and then select "Actto(B1 / Ben Ko, B307 or B309)". (Blue LED lights up).

(CH 2) Connecting to the second Bluetooth device
1. Rotate the mode switch dial to the Bluetooth mode switch (2nd (Blue LED blinking / ready to pair). 2. Activate the Bluetooth function on the device to be connected, and then select "Actto(B1 / Ben Ko, B307 or B309)". (Blue LED lights up).

(CH 3) Connecting to the third Bluetooth device
1. Rotate the mode switch dial to the Bluetooth mode switch (3rd (Blue LED blinking / ready to pair). 2. Activate the Bluetooth function on the device to be connected, and then select "Actto(B1 / Ben Ko, B307 or B309)". (Blue LED lights up).

⚠ Until **10 min** Activate the button on the corresponding channel once pairing has been completed.
(How to re-pair) You can re-pair your device with another device by pressing **Fn + A** together for 5 seconds. (Blue LED blinking / ready to pair). **Caution:** Please do not change the "mode switch dial" to change. (Automatic connection to devices registered to each channel.)

Bluetooth connection method (Mac PC)

1. Click "System Preferences" "Bluetooth" on your computer. Click "Turn Bluetooth On."
3. The Bluetooth channel is selected by rotating the mode switch dial (CH 1 to 3). (Blue LED blinking / ready to pair).
4. Select the type of device you want to search. (Select "Bluetooth"). 5. Rotate the mode switch dial to select the Bluetooth channel (CH 1 to 3). (Blue LED blinking / ready to pair). 6. Activate the Bluetooth function on the device to be connected, and then select "Actto(B1 / Ben Ko, B307 or B309)". (Blue LED lights up).

Bluetooth connection method (Windows 10 / 11)

⚠ **Before using this product, make sure your computer is equipped with a built-in Bluetooth receiver. If your computer does not have a built-in Bluetooth receiver, you will need to first install a USB Bluetooth receiver (not included) and install a Bluetooth receiver after installation.**

1. Bluetooth receivers appear in the taskbar of your Windows computer when they are connected to the computer and turned on. Click on the Bluetooth receiver icon in the taskbar. 2. Click "Add a Bluetooth device."
4. Select the type of device you want to search. (Select "Bluetooth"). 5. Rotate the mode switch dial to select the Bluetooth channel (CH 1 to 3). (Blue LED blinking / ready to pair). 6. Activate the Bluetooth function on the device to be connected, and then select "Actto(B1 / Ben Ko, B307 or B309)". (Blue LED lights up).

How to reset Bluetooth pairing

It is possible to delete all device information connected to CH 1 to 3 by pressing and holding **Fn** + **E** for approximately 3 seconds.

⚠ **Please delete the pairing information on the device side in advance before resetting. Do not delete from pairing history without resetting the Bluetooth function.**

① **Battery indicator** (Low voltage indication = Green LED blinks. Charging = Green LED on. When **fully** charged = Green LED off)
② **Caps Lock indicator** (Upon pressing the Caps Lock key, the LED turns on)
③ **Num Lock indicator** (Upon pressing the Num Lock key, the LED turns on)

⚠ **The Num Lock feature is not supported on iOS devices, and the LED is not switched on.**

14 function keys (11 hot keys)

System conversion

Ensure that the keyboard and this device to be used are set to the same OS to match other at **(Fn)**.

- **Android : Fn + S**
- **Windows : Fn + W**
- **iOS, Mac : Fn + I**

⚠ Some keys may not work depending on the device and system.
If the OS connected to each device is different, please use the keyboard after changing the corresponding OS.

Status Indicator LED

Mac System	☼1	☼2	⊞	Q	W	E	R	T	Y	U	I	O	P	[	]
iPad System	☼1	☼2	⊞	Q	W	E	R	T	Y	U	I	O	P	[	]

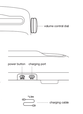
Android System	☼1	☼2	⊞	Q	W	E	R	T	Y	U	I	O	P	[	]

- For **Mac System**: **Fn** + **1** (☼ Brightness reduction), **Fn** + **2** (☼ Screen brightness), **Fn** + **3** (Launch Mission Control), **Fn** + **4** (Launch Launchpad), **Fn** + **5** (Previous song), **Fn** + **6** (Play / Pause), **Fn** + **7** (Next song), **Fn** + **8** (Mute), **Fn** + **9** (🔉 Volume -), **Fn** + **0** (🔊 Volume +), **Fn** + **-** (Delete), **Fn** + **=** (Insert), **Fn** + **[** (Home), **Fn** + **]** (End)
- For **iPad System**: **Fn** + **1** (☼ Brightness reduction), **Fn** + **2** (☼ Screen brightness), **Fn** + **3** (Launch Mission Control), **Fn** + **4** (Launch Launchpad), **Fn** + **5** (Previous song), **Fn** + **6** (Play / Pause), **Fn** + **7** (Next song), **Fn** + **8** (Mute), **Fn** + **9** (🔉 Volume -), **Fn** + **0** (🔊 Volume +), **Fn** + **-** (Delete), **Fn** + **=** (Insert), **Fn** + **[** (Home), **Fn** + **]** (End)
- For **Win System**: **Fn** + **1** (☼ Brightness reduction), **Fn** + **2** (☼ Screen brightness), **Fn** + **3** (Launch Task View), **Fn** + **4** (Launch File Explorer), **Fn** + **5** (Previous song), **Fn** + **6** (Play / Pause), **Fn** + **7** (Next song), **Fn** + **8** (Mute), **Fn** + **9** (🔉 Volume -), **Fn** + **0** (🔊 Volume +), **Fn** + **-** (Delete), **Fn** + **=** (Insert), **Fn** + **[** (Home), **Fn** + **]** (End)
- For **Android System**: **Fn** + **1** (☼ Brightness reduction), **Fn** + **2** (☼ Screen brightness), **Fn** + **3** (Launch Recent Apps), **Fn** + **4** (Launch Settings), **Fn** + **5** (Previous song), **Fn** + **6** (Play / Pause), **Fn** + **7** (Next song), **Fn** + **8** (Mute), **Fn** + **9** (🔉 Volume -), **Fn** + **0** (🔊 Volume +), **Fn** + **-** (Delete), **Fn** + **=** (Insert), **Fn** + **[** (Home), **Fn** + **]** (End)

⚠ When using the product, hold down the **Shift, Fn, Ctrl/Alt** key and press the corresponding key for use.
Performing "System Conversion" according to your device's operating system is a recommended procedure before using a Bluetooth keyboard. Some keys may not work depending on the device and system.

Volume control

Volume control dial make it convenient and easy to adjust the volume.



Power on / off

- Power on
  Push the power button to the right to turn on the power.
- Power off
  Push the power button to the left to turn off the power.

Charging method

1. Connect the supplied USB to C cable to the charging port.
2. Charging starts when the USB port part is connected to the charging adapter.

⚠ **Make sure to check charging voltage before you charge, Do not charge with a computer USB port.**
Do not use for a 5V/2A high power adapter.

Battery power saving mode

After approximately 10 minutes of inactivity, the device enters **sleep** mode. You can switch to operating mode **Press any key** by pressing any key.

Cautions

- Please turn off the **wired mode switch** before using it. 2. The presence of many Bluetooth devices may result in requency conflicts. When use this product is not disturbed by other Bluetooth devices. 3. It's not responsible or anomalie externally. It is the recommend that you remove the keyboard and reassp with the power off before cleaning. 3.It does not support waterproof or dustproof functions. Please keep the product away from water and dust. 4. Please keep away from heat sources. 5. Please keep away from moisture. 6. Please keep away from strong magnetic fields. 7. Please keep away from corrosive liquids. 8. Please keep away from direct sunlight. 9. Please keep away from sources of strong vibrations or impacts. 10. Please do not disassemble or modify the device. 11. Please do not use chemicals, detergents, or strong detergents to clean the device. Please clean with a soft dry cloth. 12. Please do not use the device in a dusty environment. 13. Please do not use the device in a high or low temperature environment. 14. Please do not use the device in a strong magnetic field environment. 15. Please do not use the device in a strong electromagnetic field environment. 16. Please do not use the device in a strong static electricity environment. 17. Please do not use the device in a strong radiation environment. 18. Please do not use the device in a strong vibration environment. 19. Please do not use the device in a strong impact environment. 20. Please do not use the device in a strong pressure environment. 21. Please do not use the device in a strong humidity environment. 22. Please do not use the device in a strong dust environment. 23. Please do not use the device in a strong corrosive environment. 24. Please do not use the device in a strong oxidizing environment. 25. Please do not use the device in a strong reducing environment. 26. Please do not use the device in a strong electromagnetic environment. 27. Please do not use the device in a strong electrostatic environment. 28. Please do not use the device in a strong radiation environment. 29. Please do not use the device in a strong vibration environment. 30. Please do not use the device in a strong impact environment. 31. Please do not use the device in a strong pressure environment. 32. Please do not use the device in a strong humidity environment. 33. Please do not use the device in a strong dust environment. 34. Please do not use the device in a strong corrosive environment. 35. Please do not use the device in a strong oxidizing environment. 36. Please do not use the device in a strong reducing environment. 37. Please do not use the device in a strong electromagnetic environment. 38. Please do not use the device in a strong electrostatic environment. 39. Please do not use the device in a strong radiation environment. 40. Please do not use the device in a strong vibration environment. 41. Please do not use the device in a strong impact environment. 42. Please do not use the device in a strong pressure environment. 43. Please do not use the device in a strong humidity environment. 44. Please do not use the device in a strong dust environment. 45. Please do not use the device in a strong corrosive environment. 46. Please do not use the device in a strong oxidizing environment. 47. Please do not use the device in a strong reducing environment. 48. Please do not use the device in a strong electromagnetic environment. 49. Please do not use the device in a strong electrostatic environment. 50. Please do not use the device in a strong radiation environment. 51. Please do not use the device in a strong vibration environment. 52. Please do not use the device in a strong impact environment. 53. Please do not use the device in a strong pressure environment. 54. Please do not use the device in a strong humidity environment. 55. Please do not use the device in a strong dust environment. 56. Please do not use the device in a strong corrosive environment. 57. Please do not use the device in a strong oxidizing environment. 58. Please do not use the device in a strong reducing environment. 59. Please do not use the device in a strong electromagnetic environment. 60. Please do not use the device in a strong electrostatic environment. 61. Please do not use the device in a strong radiation environment. 62. Please do not use the device in a strong vibration environment. 63. Please do not use the device in a strong impact environment. 64. Please do not use the device in a strong pressure environment. 65. Please do not use the device in a strong humidity environment. 66. Please do not use the device in a strong dust environment. 67. Please do not use the device in a strong corrosive environment. 68. Please do not use the device in a strong oxidizing environment. 69. Please do not use the device in a strong reducing environment. 70. Please do not use the device in a strong electromagnetic environment. 71. Please do not use the device in a strong electrostatic environment. 72. Please do not use the device in a strong radiation environment. 73. Please do not use the device in a strong vibration environment. 74. Please do not use the device in a strong impact environment. 75. Please do not use the device in a strong pressure environment. 76. Please do not use the device in a strong humidity environment. 77. Please do not use the device in a strong dust environment. 78. Please do not use the device in a strong corrosive environment. 79. Please do not use the device in a strong oxidizing environment. 80. Please do not use the device in a strong reducing environment. 81. Please do not use the device in a strong electromagnetic environment. 82. Please do not use the device in a strong electrostatic environment. 83. Please do not use the device in a strong radiation environment. 84. Please do not use the device in a strong vibration environment. 85. Please do not use the device in a strong impact environment. 86. Please do not use the device in a strong pressure environment. 87. Please do not use the device in a strong humidity environment. 88. Please do not use the device in a strong dust environment. 89. Please do not use the device in a strong corrosive environment. 90. Please do not use the device in a strong oxidizing environment. 91. Please do not use the device in a strong reducing environment. 92. Please do not use the device in a strong electromagnetic environment. 93. Please do not use the device in a strong electrostatic environment. 94. Please do not use the device in a strong radiation environment. 95. Please do not use the device in a strong vibration environment. 96. Please do not use the device in a strong impact environment. 97. Please do not use the device in a strong pressure environment. 98. Please do not use the device in a strong humidity environment. 99. Please do not use the device in a strong dust environment. 100. Please do not use the device in a strong corrosive environment. 101. Please do not use the device in a strong oxidizing environment. 102. Please do not use the device in a strong reducing environment. 103. Please do not use the device in a strong electromagnetic environment. 104. Please do not use the device in a strong electrostatic environment. 105. Please do not use the device in a strong radiation environment. 106. Please do not use the device in a strong vibration environment. 107. Please do not use the device in a strong impact environment. 108. Please do not use the device in a strong pressure environment. 109. Please do not use the device in a strong humidity environment. 110. Please do not use the device in a strong dust environment. 111. Please do not use the device in a strong corrosive environment. 112. Please do not use the device in a strong oxidizing environment. 113. Please do not use the device in a strong reducing environment. 114. Please do not use the device in a strong electromagnetic environment. 115. Please do not use the device in a strong electrostatic environment. 116. Please do not use the device in a strong radiation environment. 117. Please do not use the device in a strong vibration environment. 118. Please do not use the device in a strong impact environment. 119. Please do not use the device in a strong pressure environment. 120. Please do not use the device in a strong humidity environment. 121. Please do not use the device in a strong dust environment. 122. Please do not use the device in a strong corrosive environment. 123. Please do not use the device in a strong oxidizing environment. 124. Please do not use the device in a strong reducing environment. 125. Please do not use the device in a strong electromagnetic environment. 126. Please do not use the device in a strong electrostatic environment. 127. Please do not use the device in a strong radiation environment. 128. Please do not use the device in a strong vibration environment. 129. Please do not use the device in a strong impact environment. 130. Please do not use the device in a strong pressure environment. 131. Please do not use the device in a strong humidity environment. 132. Please do not use the device in a strong dust environment. 133. Please do not use the device in a strong corrosive environment. 134. Please do not use the device in a strong oxidizing environment. 135. Please do not use the device in a strong reducing environment. 136. Please do not use the device in a strong electromagnetic environment. 137. Please do not use the device in a strong electrostatic environment. 138. Please do not use the device in a strong radiation environment. 139. Please do not use the device in a strong vibration environment. 140. Please do not use the device in a strong impact environment. 141. Please do not use the device in a strong pressure environment. 142. Please do not use the device in a strong humidity environment. 143. Please do not use the device in a strong dust environment. 144. Please do not use the device in a strong corrosive environment. 145. Please do not use the device in a strong oxidizing environment. 146. Please do not use the device in a strong reducing environment. 147. Please do not use the device in a strong electromagnetic environment. 148. Please do not use the device in a strong electrostatic environment. 149. Please do not use the device in a strong radiation environment. 150. Please do not use the device in a strong vibration environment. 151. Please do not use the device in a strong impact environment. 152. Please do not use the device in a strong pressure environment. 153. Please do not use the device in a strong humidity environment. 154. Please do not use the device in a strong dust environment. 155. Please do not use the device in a strong corrosive environment. 156. Please do not use the device in a strong oxidizing environment. 157. Please do not use the device in a strong reducing environment. 158. Please do not use the device in a strong electromagnetic environment. 159. Please do not use the device in a strong electrostatic environment. 160. Please do not use the device in a strong radiation environment. 161. Please do not use the device in a strong vibration environment. 162. Please do not use the device in a strong impact environment. 163. Please do not use the device in a strong pressure environment. 164. Please do not use the device in a strong humidity environment. 165. Please do not use the device in a strong dust environment. 166. Please do not use the device in a strong corrosive environment. 167. Please do not use the device in a strong oxidizing environment. 168. Please do not use the device in a strong reducing environment. 169. Please do not use the device in a strong electromagnetic environment. 170. Please do not use the device in a strong electrostatic environment. 171. Please do not use the device in a strong radiation environment. 172. Please do not use the device in a strong vibration environment. 173. Please do not use the device in a strong impact environment. 174. Please do not use the device in a strong pressure environment. 175. Please do not use the device in a strong humidity environment. 176. Please do not use the device in a strong dust environment. 177. Please do not use the device in a strong corrosive environment. 178. Please do not use the device in a strong oxidizing environment. 179. Please do not use the device in a strong reducing environment. 180. Please do not use the device in a strong electromagnetic environment. 181. Please do not use the device in a strong electrostatic environment. 182. Please do not use the device in a strong radiation environment. 183. Please do not use the device in a strong vibration environment. 184. Please do not use the device in a strong impact environment. 185. Please do not use the device in a strong pressure environment. 186. Please do not use the device in a strong humidity environment. 187. Please do not use the device in a strong dust environment. 188. Please do not use the device in a strong corrosive environment. 189. Please do not use the device in a strong oxidizing environment. 190. Please do not use the device in a strong reducing environment. 191. Please do not use the device in a strong electromagnetic environment. 192. Please do not use the device in a strong electrostatic environment. 193. Please do not use the device in a strong radiation environment. 194. Please do not use the device in a strong vibration environment. 195. Please do not use the device in a strong impact environment. 196. Please do not use the device in a strong pressure environment. 197. Please do not use the device in a strong humidity environment. 198. Please do not use the device in a strong dust environment. 199. Please do not use the device in a strong corrosive environment. 200. Please do not use the device in a strong oxidizing environment. 201. Please do not use the device in a strong reducing environment. 202. Please do not use the device in a strong electromagnetic environment. 203. Please do not use the device in a strong electrostatic environment. 204. Please do not use the device in a strong radiation environment. 205. Please do not use the device in a strong vibration environment. 206. Please do not use the device in a strong impact environment. 207. Please do not use the device in a strong pressure environment. 208. Please do not use the device in a strong humidity environment. 209. Please do not use the device in a strong dust environment. 210. Please do not use the device in a strong corrosive environment. 211. Please do not use the device in a strong oxidizing environment. 212. Please do not use the device in a strong reducing environment. 213. Please do not use the device in a strong electromagnetic environment. 214. Please do not use the device in a strong electrostatic environment. 215. Please do not use the device in a strong radiation environment. 216. Please do not use the device in a strong vibration environment. 217. Please do not use the device in a strong impact environment. 218. Please do not use the device in a strong pressure environment. 219. Please do not use the device in a strong humidity environment. 220. Please do not use the device in a strong dust environment. 221. Please do not use the device in a strong corrosive environment. 222. Please do not use the device in a strong oxidizing environment. 223. Please do not use the device in a strong reducing environment. 224. Please do not use the device in a strong electromagnetic environment. 225. Please do not use the device in a strong electrostatic environment. 226. Please do not use the device in a strong radiation environment. 227. Please do not use the device in a strong vibration environment. 228. Please do not use the device in a strong impact environment. 229. Please do not use the device in a strong pressure environment. 230. Please do not use the device in a strong humidity environment. 231. Please do not use the device in a strong dust environment. 232. Please do not use the device in a strong corrosive environment. 233. Please do not use the device in a strong oxidizing environment. 234. Please do not use the device in a strong reducing environment. 235. Please do not use the device in a strong electromagnetic environment. 236. Please do not use the device in a strong electrostatic environment. 237. Please do not use the device in a strong radiation environment. 238. Please do not use the device in a strong vibration environment. 239. Please do not use the device in a strong impact environment. 240. Please do not use the device in a strong pressure environment. 241. Please do not use the device in a strong humidity environment. 242. Please do not use the device in a strong dust environment. 243. Please do not use the device in a strong corrosive environment. 244. Please do not use the device in a strong oxidizing environment. 245. Please do not use the device in a strong reducing environment. 246. Please do not use the device in a strong electromagnetic environment. 247. Please do not use the device in a strong electrostatic environment. 248. Please do not use the device in a strong radiation environment. 249. Please do not use the device in a strong vibration environment. 250. Please do not use the device in a strong impact environment. 251. Please do not use the device in a strong pressure environment. 252. Please do not use the device in a strong humidity environment. 253. Please do not use the device in a strong dust environment. 254. Please do not use the device in a strong corrosive environment. 255. Please do not use the device in a strong oxidizing environment. 256. Please do not use the device in a strong reducing environment. 257. Please do not use the device in a strong electromagnetic environment. 258. Please do not use the device in a strong electrostatic environment. 259. Please do not use the device in a strong radiation environment. 260. Please do not use the device in a strong vibration environment. 261. Please do not use the device in a strong impact environment. 262. Please do not use the device in a strong pressure environment. 263. Please do not use the device in a strong humidity environment. 264. Please do not use the device in a strong dust environment. 265. Please do not use the device in a strong corrosive environment. 266. Please do not use the device in a strong oxidizing environment. 267. Please do not use the device in a strong reducing environment. 268. Please do not use the device in a strong electromagnetic environment. 269. Please do not use the device in a strong electrostatic environment. 270. Please do not use the device in a strong radiation environment. 271. Please do not use the device in a strong vibration environment. 272. Please do not use the device in a strong impact environment. 273. Please do not use the device in a strong pressure environment. 274. Please do not use the device in a strong humidity environment. 275. Please do not use the device in a strong dust environment. 276. Please do not use the device in a strong corrosive environment. 277. Please do not use the device in a strong oxidizing environment. 278. Please do not use the device in a strong reducing environment. 279. Please do not use the device in a strong electromagnetic environment. 280. Please do not use the device in a strong electrostatic environment. 281. Please do not use the device in a strong radiation environment. 282. Please do not use the device in a strong vibration environment. 283. Please do not use the device in a strong impact environment. 284. Please do not use the device in a strong pressure environment. 285. Please do not use the device in a strong humidity environment. 286. Please do not use the device in a strong dust environment. 287. Please do not use the device in a strong corrosive environment. 288. Please do not use the device in a strong oxidizing environment. 289. Please do not use the device in a strong reducing environment. 290. Please do not use the device in a strong electromagnetic environment. 291. Please do not use the device in a strong electrostatic environment. 292. Please do not use the device in a strong radiation environment. 293. Please do not use the device in a strong vibration environment. 294. Please do not use the device in a strong impact environment. 295. Please do not use the device in a strong pressure environment. 296. Please do not use the device in a strong humidity environment. 297. Please do not use the device in a strong dust environment. 298. Please do not use the device in a strong corrosive environment. 299. Please do not use the device in a strong oxidizing environment. 300. Please do not use the device in a strong reducing environment. 301. Please do not use the device in a strong electromagnetic environment. 302. Please do not use the device in a strong electrostatic environment. 303. Please do not use the device in a strong radiation environment. 304. Please do not use the device in a strong vibration environment. 305. Please do not use the device in a strong impact environment. 306. Please do not use the device in a strong pressure environment. 307. Please do not use the device in a strong humidity environment. 308. Please do not use the device in a strong dust environment. 309. Please do not use the device in a strong corrosive environment. 310. Please do not use the device in a strong oxidizing environment. 311. Please do not use the device in a strong reducing environment. 312. Please do not use the device in a strong electromagnetic environment. 313. Please do not use the device in a strong electrostatic environment. 314. Please do not use the device in a strong radiation environment. 315. Please do not use the device in a strong vibration environment. 316. Please do not use the device in a strong impact environment. 317. Please do not use the device in a strong pressure environment. 318. Please do not use the device in a strong humidity environment. 319. Please do not use the device in a strong dust environment. 320. Please do not use the device in a strong corrosive environment. 321. Please do not use the device in a strong oxidizing environment. 322. Please do not use the device in a strong reducing environment. 323. Please do not use the device in a strong electromagnetic environment. 324. Please do not use the device in a strong electrostatic environment. 325. Please do not use the device in a strong radiation environment. 326. Please do not use the device in a strong vibration environment. 327. Please do not use the device in a strong impact environment. 328. Please do not use the device in a strong pressure environment. 329. Please do not use the device in a strong humidity environment. 330. Please do not use the device in a strong dust environment. 331. Please do not use the device in a strong corrosive environment. 332. Please do not use the device in a strong oxidizing environment. 333. Please do not use the device in a strong reducing environment. 334. Please do not use the device in a strong electromagnetic environment. 335. Please do not use the device in a strong electrostatic environment. 336. Please do not use the device in a strong radiation environment. 337. Please do not use the device in a strong vibration environment. 338. Please do not use the device in a strong impact environment. 339. Please do not use the device in a strong pressure environment. 340. Please do not use the device in a strong humidity environment. 341. Please do not use the device in a strong dust environment. 342. Please do not use the device in a strong corrosive environment. 343. Please do not use the device in a strong oxidizing environment. 344. Please do not use the device in a strong reducing environment. 345. Please do not use the device in a strong electromagnetic environment. 346. Please do not use the device in a strong electrostatic environment. 347. Please do not use the device in a strong radiation environment. 348. Please do not use the device in a strong vibration environment. 349. Please do not use the device in a strong impact environment. 350. Please do not use the device in a strong pressure environment. 351. Please do not use the device in a strong humidity environment. 352. Please do not use the device in a strong dust environment. 353. Please do not use the device in a strong corrosive environment. 354. Please do not use the device in a strong oxidizing environment. 355. Please do not use the device in a strong reducing environment. 356. Please do not use the device in a strong electromagnetic environment. 357. Please do not use the device in a strong electrostatic environment. 358. Please do not use the device in a strong radiation environment. 359. Please do not use the device in a strong vibration environment. 360. Please do not use the device in a strong impact environment. 361. Please do not use the device in a strong pressure environment. 362. Please do not use the device in a strong humidity environment. 363. Please do not use the device in a strong dust environment. 364. Please do not use the device in a strong corrosive environment. 365. Please do not use the device in a strong oxidizing environment. 366. Please do not use the device in a strong reducing environment. 367. Please do not use the device in a strong electromagnetic environment. 368. Please do not use the device in a strong electrostatic environment. 369. Please do not use the device in a strong radiation environment. 370. Please do not use the device in a strong vibration environment. 371. Please do not use the device in a strong impact environment. 372. Please do not use the device in a strong pressure environment. 373. Please do not use the device in a strong humidity environment. 374. Please do not use the device in a strong dust environment. 375. Please do not use the device in a strong corrosive environment. 376. Please do not use the device in a strong oxidizing environment. 377. Please do not use the device in a strong reducing environment. 378. Please do not use the device in a strong electromagnetic environment. 379. Please do not use the device in a strong electrostatic environment. 380. Please do not use the device in a strong radiation environment. 381. Please do not use the device in a strong vibration environment. 382. Please do not use the device in a strong impact environment. 383. Please do not use the device in a strong pressure environment. 384. Please do not use the device in a strong humidity environment. 385. Please do not use the device in a strong dust environment. 386. Please do not use the device in a strong corrosive environment. 387. Please do not use the device in a strong oxidizing environment. 388. Please do not use the device in a strong reducing environment. 389. Please do not use the device in a strong electromagnetic environment. 390. Please do not use the device in a strong electrostatic environment. 391. Please do not use the device in a strong radiation environment. 392. Please do not use the device in a strong vibration environment. 393. Please do not use the device in a strong impact environment. 394. Please do not use the device in a strong pressure environment. 395. Please do not use the device in a strong humidity environment. 396. Please do not use the device in a strong dust environment. 397. Please do not use the device in a strong corrosive environment. 398. Please do not use the device in a strong oxidizing environment. 399. Please do not use the device in a strong reducing environment. 400. Please do not use the device in a strong electromagnetic environment. 401. Please do not use the device in a strong electrostatic environment. 402. Please do not use the device in a strong radiation environment. 403. Please do not use the device in a strong vibration environment. 404. Please do not use the device in a strong impact environment. 405. Please do not use the device in a strong pressure environment. 406. Please do not use the device in a strong humidity environment. 407. Please do not use the device in a strong dust environment. 408. Please do not use the device in a strong corrosive environment. 409. Please do not use the device in a strong oxidizing environment. 410. Please do not use the device in a strong reducing environment. 411. Please do not use the device in a strong electromagnetic environment. 412. Please do not use the device in a strong electrostatic environment. 413. Please do not use the device in a strong radiation environment. 414. Please do not use the device in a strong vibration environment. 415. Please do not use the device in a strong impact environment. 416. Please do not use the device in a strong pressure environment. 417. Please do not use the device in a strong humidity environment. 418. Please do not use the device in a strong dust environment. 419. Please do not use the device in a strong corrosive environment. 420. Please do not use the device in a strong oxidizing environment. 421. Please do not use the device in a strong reducing environment. 422. Please do not use the device in a strong electromagnetic environment. 423. Please do not use the device in a strong electrostatic environment. 424. Please do not use the device in a strong radiation environment. 425. Please do not use the device in a strong vibration environment. 426. Please do not use the device in a strong impact environment. 427. Please do not use the device in a strong pressure environment. 428. Please do not use the device in a strong humidity environment. 429. Please do not use the device in a strong dust environment. 430. Please do not use the device in a strong corrosive environment. 431. Please do not use the device in a strong oxidizing environment. 432. Please do not use the device in a strong reducing environment. 433. Please do not use the device in a strong electromagnetic environment. 434. Please do not use the device in a strong electrostatic environment. 435. Please do not use the device in a strong radiation environment. 436. Please do not use the device in a strong vibration environment. 437. Please do not use the device in a strong impact environment. 438. Please do not use the device in a strong pressure environment. 439. Please do not use the device in a strong humidity environment. 440. Please do not use the device in a strong dust environment. 441. Please do not use the device in a strong corrosive environment. 442. Please do not use the device in a strong oxidizing environment. 443. Please do not use the device in a strong reducing environment. 444. Please do not use the device in a strong electromagnetic environment. 445. Please do not use the device in a strong electrostatic environment. 446. Please do not use the device in a strong radiation environment. 447. Please do not use the device in a strong vibration environment. 448. Please do not use the device in a strong impact environment. 449. Please do not use the device in a strong pressure environment. 450. Please do not use the device in a strong humidity environment. 451. Please do not use the device in a strong dust environment. 452. Please do not use the device in a strong corrosive environment. 453. Please do not use the device in a strong oxidizing environment. 454. Please do not use the device in a strong reducing environment. 455. Please do not use the device in a strong electromagnetic environment. 456. Please do not use the device in a strong electrostatic environment. 457. Please do not use the device in a strong radiation environment. 458. Please do not use the device in a strong vibration environment. 459. Please do not use the device in a strong impact environment. 460. Please do not use the device in a strong pressure environment. 461. Please do not use the device in a strong humidity environment. 462. Please do not use the device in a strong dust environment. 463. Please do not use the device in a strong corrosive environment. 464. Please do not use the device in a strong oxidizing environment. 465. Please do not use the device in a strong reducing environment. 466. Please do not use the device in a strong electromagnetic environment. 467. Please do not use the device in a strong electrostatic environment. 468. Please do not use the device in a strong radiation environment. 469. Please do not use the device in a strong vibration environment. 470. Please do not use the device in a strong impact environment. 471. Please do not use the device in a strong pressure environment. 472. Please do not use the device in a strong humidity environment. 473. Please do not use the device in a strong dust environment. 474. Please do not use the device in a strong corrosive environment. 475. Please do not use the device in a strong oxidizing environment. 476. Please do not use the device in a strong reducing environment. 477. Please do not use the device in a strong electromagnetic environment. 478. Please do not use the device in a strong electrostatic environment. 479. Please do not use the device in a strong radiation environment. 480. Please do not use the device in a strong vibration environment. 481. Please do not use the device in a strong impact environment. 482. Please do not use the device in a strong pressure environment. 483. Please do not use the device in a strong humidity environment. 484. Please do not use the device in a strong dust environment. 485. Please do not use the device in a strong corrosive environment. 486. Please do not use the device in a strong oxidizing environment. 487. Please do not use the device in a strong reducing environment. 488. Please do not use the device in a strong electromagnetic environment. 489. Please do not use the device in a strong electrostatic environment. 490. Please do not use the device in a strong radiation environment. 491. Please do not use the device in a strong vibration environment. 492. Please do not use the device in a strong impact environment. 493. Please do not use the device in a strong pressure environment. 494. Please do not use the device in a strong humidity environment. 495. Please do not use the device in a strong dust environment. 496. Please do not use the device in a strong corrosive environment. 497. Please do not use the device in a strong oxidizing environment. 498. Please do not use the device in a strong reducing environment. 499. Please do not use the device in a strong electromagnetic environment. 500. Please do not use the device in a strong electrostatic environment. 501. Please do not use the device in a strong radiation environment. 502. Please do not use the device in a strong vibration environment. 503. Please do not use the device in a strong impact environment. 504. Please do not use the device in a strong pressure environment. 505. Please do not use the device in a strong humidity environment. 506. Please do not use the device in a strong dust environment. 507. Please do not use the device in a strong corrosive environment. 508. Please do not use the device in a strong oxidizing environment. 509. Please do not use the device in a strong reducing environment. 510. Please do not use the device in a strong electromagnetic environment. 511. Please do not use the device in a strong electrostatic environment. 512. Please do not use the device in a strong radiation environment. 513. Please do not use the device in a strong vibration environment. 514. Please do not use the device in a strong impact environment. 515. Please do not use the device in a strong pressure environment. 516. Please do not use the device in a strong humidity environment. 517. Please do not use the device in a strong dust environment. 518. Please do not use the device in a strong corrosive environment. 519. Please do not use the device in a strong oxidizing environment. 520. Please do not use the device in a strong reducing environment. 521. Please do not use the device in a strong electromagnetic environment. 522. Please do not use the device in a strong electrostatic environment. 523. Please do not use the device in a strong radiation environment. 524. Please do not use the device in a strong vibration environment. 525. Please do not use the device in a strong impact environment. 526. Please do not use the device in a strong pressure environment. 527. Please do not use the device in a strong humidity environment. 528. Please do not use the device in a strong dust environment. 529. Please do not use the device in a strong corrosive environment. 530. Please do not use the device in a strong oxidizing environment. 531. Please do not use the device in a strong reducing environment. 532. Please do not use the device in a strong electromagnetic environment. 533. Please do not use the device in a strong electrostatic environment. 534. Please do not use the device in a strong radiation environment. 535. Please do not use the device in a strong vibration environment. 536. Please do not use the device in a strong impact environment. 537. Please do not use the device in a strong pressure environment. 538. Please do not use the device in a strong humidity environment. 539. Please do not use the device in a strong dust environment. 540. Please do not use the device in a strong corrosive environment. 541. Please do not use the device in a strong oxidizing environment. 542. Please do not use the device in a strong reducing environment. 543. Please do not use the device in a strong electromagnetic environment. 544. Please do not use the device in a strong electrostatic environment. 545. Please do not use the device in a strong radiation environment. 546. Please do not use the device in a strong vibration environment. 547. Please do not use the device in a strong impact environment. 548. Please do not use the device in a strong pressure environment. 549. Please do not use the device in a strong humidity environment. 550. Please do not use the device in a strong dust environment. 551. Please do not use the device in a strong corrosive environment. 552. Please do not use the device in a strong oxidizing environment. 553. Please do not use the device in a strong reducing environment. 554. Please do not use the device in a strong electromagnetic environment. 555. Please do not use the device in a strong electrostatic environment. 556. Please do not use the device in a strong radiation environment. 557. Please do not use the device in a strong vibration environment. 558. Please do not use the device in a strong impact environment. 559. Please do not use the device in a strong pressure environment. 560. Please do not use the device in a strong humidity environment. 561. Please do not use the device in a strong dust environment. 562. Please do not use the device in a strong corrosive environment. 563. Please do not use the device in a strong oxidizing environment. 564. Please do not use the device in a strong reducing environment. 565. Please do not use the device in a strong electromagnetic environment. 566. Please do not use the device in a strong electrostatic environment. 567. Please do not use the device in a strong radiation environment. 568. Please do not use the device in a strong vibration environment. 569. Please do not use the device in a strong impact environment. 570. Please do not use the device in a strong pressure environment. 571. Please do not use the device in a strong humidity environment. 572. Please do not use the device in a strong dust environment. 573. Please do not use the device in a strong corrosive environment. 574. Please do not use the device in a strong oxidizing environment. 575. Please do not use the device in a strong reducing environment. 576. Please do not use the device in a strong electromagnetic environment. 577. Please do not use the device in a strong electrostatic environment. 578. Please do not use the device in a strong radiation environment. 579. Please do not use the device in a strong vibration environment. 580. Please do not use the device in a strong impact environment. 581. Please do not use the device in a strong pressure environment. 582. Please do not use the device in a strong humidity environment. 583. Please do not use the device in a strong dust environment.
