Model No: ZR-M95BT

Keep Health Always Around you!

Dear Valued Customer

Thank you for purchasing our Hearing Aids.

Our hearing aids are professional instruments designed to help people with hearing loss to hear better.

Please read these instructions carefully before using them. You should use and care for your hearing instruments to prolong the life of your hearing instruments.

Basic Product Information

Product Name

In-Ear Bluetooth Earphone

Product Model

ZR-G400BT

Product Size

65*29*30 mm/ 25.6*11.4*11.8 In

Structure Composition

In-Ear Bluetooth Hearing Aid is composed of Main unit, battery and ear tips

16-Channel Signal System

One of the key features this product is its 16-channel signal system, which efficiently processes sounds by frequency into separate channels for a more personalized listening experience. This system is complemented by 3 WDR (Wide Dynamic Range Compression) adjustments tailored to individual tracks, providing greater accuracy and authenticity

Applicable Scope

For the group with hearing loss.

Contraindications

Acute otitis externa, otitis, chronic purulent otitis media (in the period of pus infection), acute suppurative otitis media and allergic otitis media.

13

Product Specifications

Charger battery capacity: 300mAh
Charging bay range: 90-110 hours
Charger charging time: 2 hours

Handset endurance:
15 hours
Bluetooth 6 hours

Normal Operating Conditions	
Ambient Temperature	0°C~ 40°C;
Relative Humidity	≤80%;
Atmospheric Pressure	86KPa ~ 106kPa;
Working Voltage	D.c.37v
Product Electroacoustic Performance	
Maximum OSPL90	≤120dB±3dB
Output Sound Pressure Level (250Hz frequency range band)	115dB±AdB
Full Range Sound Pressure Level (20-20KHz frequency range)	45dB±5dB
Equivalent Input Noise Level (1kHz frequency range)	≤8dB±3dB
Frequency Response Range	400Hz~4500Hz
Total Harmonic Distortion (1kHz frequency range)	≤7±3%
Rechargeable Battery	Lithium Polymer Battery, Capacity
Capacity	50mAh, DC3.7V
Rated Operating Current:	≤10mA

Precautions, Warnings

1. Before wearing a hearing aid, you should have a professional hearing test and be under the supervision of a physician.

2. Protect from moisture, shock and heat.

3. Do not immerse your hearing instruments in water. Before swimming, remove the headset and place it in the charging case. After swimming or bathing, wait until the ear canal is dry before putting the hearing aid back on.

4. After removing the hearing instrument at night, place the hearing instrument in the charging case to charge. Avoid exposure to strong light, high temperature and high humidity.

5. The outside of the hearing instrument should be kept clean. Dirt inside the earplugs should be cleaned frequently.

15

and A Note on Advice

6. Hearing aids should be protected from electromagnetic radiation and should not be used in high-frequency thermotherapy or radiation therapy.

7. Do not use in potentially explosive atmospheres or hazardous conditions.

8. Hearing aids should not be disposed of with normal municipal waste. Since hearing aids have built-in batteries, please use battery disposal facilities to protect the environment.

9. Do not allow children to play with the product and accessories to avoid injury to children or possible damage to the device.

16

Product Maintenance

1. Please charge the hearing aid well in advance if it is not going to be used, that there is enough power for use. 2. Use a clean, soft cloth to clean the hearing instrument case. 3. Please clean and disinfect the ear plugs with pure warm water.

Disposal Of Waste And Residue

1. There is a battery inside this product, and the host has electronic components. 2. Disposal should comply with the corresponding national laws and regulations.

Hear The world Again

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

RF warning for Portable device: The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
