The image shows a green PCB with various components. A ruler at the bottom indicates the board's size, which is approximately 10 cm wide and 5 cm high. Key components and markings include:

- Microcontroller:** A small black chip with pins, likely the main processor.
- Capacitors:** Several electrolytic capacitors (e.g., 220µF, 10V) and ceramic capacitors (e.g., 100nF, 10µF).
- Resistors:** Various surface-mount resistors of different values.
- Connectors:** A USB connector and a multi-pin header.
- Text Markings:** "RoHS", "C212", "L2M", "E20803", "34N-B", and "34N-B" are visible on the board.
