

User's manual

7 Inch Car Multimedia System

Model: CMR-710HD

Attention

-You are welcome to use our product. In order to give full understanding to the features of this product, you should read this manual carefully before using it for the first time to familiarize yourself with the functions and operations of this multimedia system. Please follow the "User Manual" when using this multimedia system. Man-made damage is not covered by the warranty.

-When there is an abnormal phenomenon in the multimedia system, please refer to the solution of the "Common Troubleshooting Guide" in the manual. If the fault cannot be eliminated, please send it to a professional repair station, and the professional will repair it. Please do not remove the cover or adjust any parts without authorization.

-The illustrations in this manual are to explain how to operate more clearly. If it is inconsistent with the actual product during use, please refer to the actual product.

-The multimedia system may be affected when passing bridges, mountains, tunnels, and underground parking lots; it may also cause "sound skipping" when the vehicle continues to turbulence, which is normal.

-Please do not touch the screen with hard sharp objects to avoid damage to the screen. Avoid spraying liquid directly on the screen. If liquid leaks into the unit, it will damage the electronic components.

-When cleaning the surface of the display screen, please wipe it with soft cloth. Do not directly wipe the surface of the display screen with liquid.

-Do not plug and unplug the USB device frequently. When the file is read, the sudden unplug may damage your USB device.

-There are many types of USB devices from market, and this unit cannot guarantee compatibility with all USB devices.

-Due to the inconsistent compression standards and format versions of audio and video files in USB, some files may cause system anomalies.

Touch button function

1.  Back to home page
2.  Short press to step 1 to decrease volume, long press to step 5 to decrease volume
3.  Short press to step 1 to increase volume, long press to step 5 to increase volume
4.  Click to enter the APP interface
5.  The language assistant button is available on the Carplay interface and Android Auto interface. Click on other interfaces to enter the Bluetooth pairing interface

13.Radar Detector Menu

Click on the 'Radar Detector ' icon on the app interface to enter the Radar Detector interface.
Display radar information.

14.Accessories Menu

Click on the 'Accessories ' icon on the app interface to enter the Accessories interface.

▶ Wiring Diagram

▶ Safety Warning

-This multimedia system is used in a car equipped with a 12V negative grounding battery system. Please do not directly install this multimedia system on a 24V battery truck or bus.

-Do not expose the multimedia system to excessive humidity, otherwise it will cause electrical short circuit and cause fire or other damage.

-When liquid seeps into the machine and there is a peculiar smell, please stop using the multimedia system immediately. If you continue to use it, it may cause a fire or other accidents.

-When driving, please adjust the volume to an appropriate level. If the volume is too high, it will interfere with the driver's listening to the information outside the vehicle.

-Do not perform complicated operations while driving to avoid traffic accidents caused by distracting the driver's attention.

-Do not insert anything other than the USB standard interface into the USB slot

Warning

This device has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This device generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this device does cause harmful interference to radio or television reception, which can be determined by turning the device off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the device and receiver.
- Connect the device into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment

Radiation Exposure Statement

The antennas used for this transmitter must be installed to provide a separation

distance of at least 20 cm from all persons and must not be co-located for operating in conjunction with any other antenna or transmitter.

This device contains licence-exempt transmitter(s)/receiver(s) that comply with Innovation, Science and Economic Development Canada's licence-exempt RSS(s). Operation is subject to the following two conditions: (1) This device may not cause interference. (2) This device must accept any interference, including interference that may cause undesired operation of the device

Cet appareil contient des émetteurs / récepteurs exemptés de licence conformes aux RSS (RSS) d'Innovation, Sciences et Développement économique Canada. Le fonctionnement est soumis aux deux conditions suivantes : (1) Cet appareil ne doit pas causer d'interférences. (2) Cet appareil doit accepter toutes les interférences, y compris celles susceptibles de provoquer un fonctionnement indésirable de l'appareil
