

Quick Start Guide

X10 ULTRA

1. Startup and Power off

Startup: Long press POWER key for three seconds, you can enter into startup picture.

Power off: Long press POWER, it will popup Power off window. Click Power off is the last step.

2. Using Tablet Features

- a. Internet: Your device's networking capabilities allow you to access Internet using your browser through Wi-Fi, or LTE.
- b. Photos: In the gallery, you can see captured/saved pictures and videos.
- c. Play Music: Using the YT Music Player, you can play your favorite music.
- d. Camera: Use the Rear and Front cameras to capture pictures and record videos.

3. Settings

Wi-Fi: Select Wi-Fi from settings if you wish to use Wi-Fi for your data connection. Open the Wi-Fi settings screen; select it from the network list. Provide your username or password if required.

Mobile Network: Select Mobile data, Roaming, Data usage, Mobile data always online, Preferred network type, Automatically select network, Access Point Name.

Hotspot & Tethering: Tablet can be used as a wireless modem for PCs, Tablets and Mobile Phones.

Notifications: Notifications appear at the top of the screen. You can change the notification alerts settings for applications.

Apps: Using this you can manage your applications in Tablet.
Storage: View and manage the data storage in your Tablet.
Accessibility: These are the settings to help visually impaired users.
Date & Time: Enables you to set your device's date and time.

4. Applications

- Gmail: Email by Google: secure, smart, and easy to use.
- Google Maps: Explore and navigate your world with Google Maps. Find places you'll love, connect with businesses you're interested in, and get around with real-time traffic information.
- Google Play: Google Play is your entertainment unbound. It brings together all of the entertainment you love and helps you explore it in new ways, anytime, anywhere.
- Google Play, Gmail and Google Maps are trademarks of Google LLC.

Safety Information

- Please do not use device during charging. Always disconnect the device from charger before use.
- Do not use the device if the screen is cracked or broken. Cracked or broken screen could cause injury to hands or face.
- Avoid using device and batteries in extreme temperature, such as excessively cold, excessively hot, too humid or too dusty. Your device contains electronics parts and circuits, keep them out of the reach of small children.
- Switch off your device in any area with a potentially explosive atmosphere.

FCC Regulations:

This mobile tablet complies with part 15 of the FCC Rules.

Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This mobile tablet has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

The antenna(s) used for this transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.

RF Exposure Information (SAR)

This device is designed and manufactured not to exceed the emission limits for exposure to radio frequency (RF) energy set by the Federal Communications Commission of the United States. During SAR testing, this device was set to transmit at its highest certified power level in all tested frequency bands, and placed in positions that simulate RF exposure in usage against the head with no separation, and near the body with the separation of 0 mm. Although the SAR is determined at the highest certified power level, the actual SAR level of the device while operating can be well below the maximum value. This is because the device is designed to operate at multiple power levels so as to use only the power required to reach the network. In general, the closer you are to a wireless base station antenna, the lower the power output. The exposure standard for wireless devices employing a unit of measurement is known as the Specific Absorption Rate, or SAR. The SAR limit set by the FCC is 1.6W/kg.
