

EXHIBIT 3 - EUT INTERNAL PHOTOGRAPHS

EUT Housing and Board View 1	 A photograph showing the back of a black mobile phone housing and its internal battery. The battery is black with 'NTVIG' printed in white. The phone's camera and flash are visible at the top left. A black ruler with white markings is placed vertically to the left of the components for scale. The background is a light blue textured surface.
EUT Housing and Board View 2	 A photograph showing the front of a black mobile phone housing, the internal battery, and the phone's internal circuit board. The battery is black with 'NTVIG' printed in white. The circuit board is silver with various components. A black ruler with white markings is placed vertically to the left of the components for scale. The background is a light blue textured surface.

EUT Housing and
Board View 3

EUT Housing and
Board View 4

Solder Board-Component View 1	 A photograph of a small, rectangular electronic component, likely a solder board, placed on a blue textured surface. The component is dark green with various electronic components, including a large black chip, several smaller chips, and numerous surface-mount components. It is positioned next to a black ruler with white markings, which shows dimensions in millimeters. The ruler is oriented vertically, with the component's length corresponding to the 0 to 100 mm scale.
Solder Board-Component View 2	 A photograph of the same electronic component from a different angle, showing the underside. The component is dark green with various electronic components, including a large black chip, several smaller chips, and numerous surface-mount components. It is positioned next to a black ruler with white markings, which shows dimensions in millimeters. The ruler is oriented vertically, with the component's length corresponding to the 0 to 100 mm scale.

Solder Board-Component View 3	 A photograph showing a small electronic component, likely a microcontroller or sensor, mounted on a blue solder mask. The component is connected to a circular pad on the board. A black ruler with white markings is placed below the component for scale, showing measurements in millimeters. The ruler has markings from 0 to 100 mm.
Solder Board-Component View 4	 A photograph showing the same electronic component from a different angle, highlighting the solder connections. The component is mounted on a blue solder mask. A black ruler with white markings is placed below the component for scale, showing measurements in millimeters. The ruler has markings from 0 to 100 mm.

Solder Board-Component View 5	 A photograph of a small electronic circuit board (likely a mobile phone component) placed on a blue textured surface. The board is positioned next to a black ruler with white markings. The ruler shows measurements in millimeters (0 to 100 mm) and centimeters (0 to 10 cm). The board features various components, including a large black integrated circuit (IC) labeled 'MT6735', several smaller ICs, and gold-colored solder points. A thin, flexible white cable is attached to the right side of the board.
Solder Board-Component View 6	 A close-up photograph of the same electronic circuit board, showing the underside or a different angle. The board is placed on a blue textured surface. It features a large black IC labeled 'MT6735', a smaller IC labeled 'MT6735', and a large black component labeled 'SE2223S'. A thin, flexible white cable is attached to the left side of the board.

Solder Board-Component View 7	 A photograph of a mobile phone's internal circuit board (PCBA) laid flat on a blue textured surface. The board is populated with various electronic components, including a large MediaTek ARM processor chip in the center, several memory modules, and various smaller integrated circuits. Two yellow circular markers are placed on the left side of the board. A black antenna module is visible on the right side.
Antenna View	 A photograph showing the back of a mobile phone with its antenna components exposed. A black ruler is placed vertically on the left side of the phone for scale. Three red rectangular boxes highlight specific antenna areas, each with a corresponding text label. The top-left box is labeled 'WIFI/BT/GPS Ant'. The top-right box is labeled 'GSM1900; WCDMA Band 2/ 4; LTE Band 2/4/66Ant.'. The bottom box is labeled 'GSM850; WCDMA Band 5; LTE Band 5/12/71 Ant.'.
