

EXHIBIT 3 - EUT INTERNAL PHOTOGRAPHS

EUT Housing and Board View 1	 A photograph showing the internal components of a mobile phone, specifically the battery and surrounding circuitry. The battery is a yellow and black Li-polymer battery with the brand name "DIALN" and model "PLG456390". It has a capacity of 4500mAh and a voltage of 3.85V. The battery is placed on a blue background with a black ruler for scale. The ruler shows measurements in millimeters and centimeters. The battery is connected to a black ribbon cable. Other components visible include a small metal shield, a red component, and various solder points and connectors.
Solder Board-Component View 1	 A photograph showing a close-up of a solder board component, likely a SIM card or a small circuit board. The component is placed on a blue background with a black ruler for scale. The ruler shows measurements in millimeters and centimeters. The component is a small, rectangular board with various components, including a SIM card slot, a small metal shield, and various solder points and connectors.

Solder Board-Component View 2	 A photograph showing a small, irregularly shaped electronic component, likely a solder mask or a small PCB, placed on a blue textured surface. The component is positioned next to a black ruler with white markings. The ruler has two scales: one in centimeters (0 to 10) and one in millimeters (0 to 100). The component is roughly rectangular with some protrusions and is oriented horizontally.
Solder Board-Component View 3	 A photograph showing a larger, more complex electronic component, likely a PCB, placed on a blue textured surface. The component is positioned next to a black ruler with white markings. The ruler has two scales: one in centimeters (0 to 10) and one in millimeters (0 to 100). The component is roughly rectangular with many small components and traces. It is oriented horizontally.
