

Applicant/Grantee:	Bear Robotics, Inc.		
FCC ID:	2BAKL-WB26-9P		
Section 15.212 Modular Transmitters			
	Request for Modular Approval	Request for Limited Modular Approval	
	Requirements	Device Conditions	Comply (Y/N)
Single Modular Approval Requirements			
1	The radio elements must have the radio frequency circuitry shielded.	The module has its own RF shielding.” Shield Can is employed on the board structure, please see exhibition External Photo, the emission measurement was conducted without further shielding added.	Y
2	The module must have buffered modulation/data inputs to ensure that the device will comply with Part 15 requirements with any type of input signal.	All modulation and data input(s) are buffered.” The EUT has buffered data inputs, it is integrated on chip STM32WLE5 The module has an inherent RF transmission cadence and autonomously regulates RF communication to meet compliance requirements. Even if the external data input frequency increases, new data cannot be transmitted immediately if the module's internal cadence is not met. Instead, the data will be buffered internally and transmitted at the appropriate time.	Y
3	The module must contain power supply regulation on the module.	The module integrates two optional power supply regulation , DCDC and LDO. Users can choose one of them by software configuration to power the module's core ,RF and digital circuit.	Y
4	The module must contain a permanently attached antenna, or contain a unique antenna connector, and be marketed and operated only with specific antenna(s), per §§ 15.203, 15.204(b), 15.204(c), 15.212(a), 2.929(b)	The EUT meets the FCC antenna Requirements.	Y
5	The module must demonstrate compliance in a stand-alone configuration.	The modular transmitter was tested in a stand-alone configuration via a UART Interface.	Y
6	The module must be labelled with its permanently affixed FCC ID label	In the exhibition OEM manual, there are Instructions given to the OEM on how to label the end product.	Y
7	The module must comply with all specific rules applicable to the transmitter, including all the conditions provided in the integration instructions by the grantee	The module is compliant with all applicable FCC rules. Instructions for maintaining compliance are given in the integration guide.	Y

8	The module must comply with RF exposure requirements	Please refer the Maximum Permissible Exposure Information.	Y
