

EXHIBIT 3 - EUT INTERNAL PHOTOGRAPHS

EUT Housing and Board View 1	 This photograph shows the internal components of the EUT housing, including the battery, main board, and various connectors. A ruler is placed vertically on the left side of the image for scale. The battery is a yellow rectangular unit with the text "EUT 1500mAh 3.7V" and "EUT 1500mAh 3.7V" printed on it. The main board is green and features various components, including a camera lens and a microphone. The text "EUT 1500mAh 3.7V" is also visible on the board.
EUT Housing and Board View 2	 This photograph shows the internal components of the EUT housing, including the battery, main board, and various connectors. A ruler is placed vertically on the left side of the image for scale. The battery is a yellow rectangular unit with the text "EUT 1500mAh 3.7V" and "EUT 1500mAh 3.7V" printed on it. The main board is green and features various components, including a camera lens and a microphone. The text "EUT 1500mAh 3.7V" is also visible on the board.

EUT Housing and Board View 3	 A photograph showing the internal components of a mobile phone housing. The battery is visible, labeled 'SAMSUNG SDI 224150 3745'. To the right of the battery is the main circuit board with various components. Below the main board is a smaller green circuit board. A black ruler with white markings is placed horizontally at the bottom of the components for scale.
Solder Board-Component View 1	 A close-up photograph of the solder joints on the main circuit board. The board is green and populated with various electronic components. A black ruler with white markings is placed horizontally at the bottom of the board for scale.

Solder Board-Component View 2	 A photograph of a green printed circuit board (PCB) component, likely a camera module, positioned on a blue textured surface. The component features a black lens assembly, a silver metal shield, and various electronic components. A black ruler with white markings is placed horizontally below the component, showing measurements in millimeters (0 to 100 mm) and centimeters (0 to 10 cm).
Solder Board-Component View 3	 A photograph of the same green PCB component from a different angle, showing the underside. It features a silver metal shield, a black lens assembly, and various electronic components. A black ruler with white markings is placed horizontally below the component, showing measurements in millimeters (0 to 100 mm) and centimeters (0 to 10 cm).

Solder Board-Component View 4	 A photograph of a green printed circuit board (PCB) component, identified as 'View 4'. The board is rectangular and populated with various electronic components, including a large black integrated circuit (IC) in the center, several smaller surface-mount components, and a silver-colored metal shield on the right side. The board is placed on a blue textured surface. A black ruler with white markings is positioned horizontally below the board, showing measurements in millimeters (0 to 100 mm) and centimeters (0 to 10 cm). A vertical ruler is also visible on the left side of the board, showing measurements in millimeters (0 to 100 mm) and centimeters (0 to 10 cm).
Solder Board-Component View 5	 A photograph of the same green printed circuit board (PCB) component, identified as 'View 5'. This view shows the opposite side of the board, featuring a different arrangement of components, including a large black IC, various surface-mount components, and a silver-colored metal shield. The board is placed on the same blue textured surface. A black ruler with white markings is positioned horizontally below the board, showing measurements in millimeters (0 to 100 mm) and centimeters (0 to 10 cm). A vertical ruler is also visible on the left side of the board, showing measurements in millimeters (0 to 100 mm) and centimeters (0 to 10 cm).
