

EXHIBIT 3 - EUT INTERNAL PHOTOGRAPHS

EUT Housing and Board View 1	 A photograph showing the internal components of an EUT (Electronic Under Test) housing. The housing is open, revealing a printed circuit board (PCB) with various electronic components, including a battery, capacitors, and integrated circuits. A yellow flexible ribbon cable is connected to the board. The components are placed on a blue textured surface. A black ruler with white markings is visible on the left and bottom, providing a scale for the components.
Solder Board-Component View 1	 A close-up photograph of a solder board-component. The component is a small, rectangular PCB with various electronic components, including a microcontroller, capacitors, and resistors. It is connected to a black wire. The component is placed on a blue textured surface. A black ruler with white markings is visible on the left and bottom, providing a scale for the component.

Solder Board-Component View 2	 A photograph of a small, rectangular electronic component (likely a microcontroller or sensor) mounted on a blue, textured solder mask. The component is positioned on a black background with white millimeter markings. The markings are oriented vertically and horizontally, with the horizontal scale ranging from 0 to 80 mm and the vertical scale ranging from 0 to 60 mm. The component itself is dark with various gold-colored pads and components visible.
Solder Board-Component View 3	 A photograph of the same electronic component from a different angle, showing the underside or a different side. The component is mounted on a blue, textured solder mask. The background features the same black and white millimeter markings as in View 2, with the horizontal scale ranging from 0 to 80 mm and the vertical scale ranging from 0 to 60 mm. The component's layout and components are visible from this perspective.

Solder Board-Component View 4	 A photograph showing a small, rectangular, gold-colored component with two thin wires (one red, one black) attached. The component is placed on a blue textured surface. A black ruler with white markings is visible on the left and bottom, showing measurements in millimeters. The component is positioned near the 10 mm mark on the bottom ruler.
Antenna View	 A photograph showing a small, rectangular, black component with two thin wires (one red, one black) attached. The component is placed on a blue textured surface. A black ruler with white markings is visible on the left and bottom, showing measurements in millimeters. The component is positioned near the 10 mm mark on the bottom ruler. Two red lines with labels point to the wires: "BT EDR Antenna" points to the red wire, and "BT BLE Antenna" points to the black wire.
