

Quick instructions

Open pairing broadcast

Press and hold the button for 3 seconds in the off state, the device will play a short “chord tone” and then release the button to turn on the device automatically.[The broadcasting time is 10 minutes after power on, if no pairing and binding within 10 minutes, the broadcasting will be turned off automatically and enter the shutdown mode]

Pair device

- ① Open Apple's self built-in " Find My" App;
- ② Bring the device close to your iPhone, tap the "Items" tab, select "+", and click on "Add Other Item";
- ③ For devices with the words' Locator Tag ', tap' Connect ';
- ④ Fill in "Name Item" to name your device and select a emoticon;
- ⑤ Agree to register the device with your Apple ID;
- ⑥ Tap 'Finish' to pair successfully.

Enable lost mode

- ① Open Apple's self built-in "Find My" app, click on "Items" at the bottom of the screen, click on the item's name;
- ② Under "Lost Mode", click "Enable";
- ③ Follow the instructions on the screen and click 'Continue' to enter the contact phone or email settings.
- ④After clicking "Next" to check the information, please click "Enable" again to complete the setting.

Remove device

- 1 Open Apple's self built-in "Find My" app, click on "Items" at the bottom of the screen, and then click on the item's name;
2. Find "Remove Item" at the bottom of the list and tap "Remove" to complete the operation.

Equipment shutdown

Press and hold the button for 3 seconds in the power-on state, and release the button to turn off the device when you hear a “drop” sound.

*Restore Factory Settings: After 5 consecutive button clicks in the power-on state, the device will play a “short chord tone”, and the product will be restored to the factory state.

Main Functions

1. Locate your item

When the device and the iphone are beyond the Bluetooth distance, the device cannot be linked in the "Find My" app. Available options: Lost Mode, select Enabled. Enter your contact number etc. If the device is disconnected from your iphone for an extended period of time and there are other iPhones nearby, you will receive notifications and the latest location in your "Find My"app.

2. Play Sound

The iphone and the device are within the Bluetooth range (usually about 20 meters), in the " Find My" APP, click " Play Sound", and the device will make a sound to help you quickly find nearby items.

Instructions for device button

1.Turn On

Press and hold the button for 3 seconds in the off state, the device will play a short “chord tone” and then release the button to turn on the device automatically.[The broadcasting time is 10 minutes after power on, if no pairing and binding within 10 minutes, the broadcasting will be turned off automatically and enter the shutdown mode]

2.Device re-enters pairing state

When the device is removed, it will beep and the pairing broadcast will be on. If there is no re-pairing within 10 minutes, the device will leave the pairing state, and the device and APP cannot be paired at this time. If you need to pair the device, you need to follow the "Turn on the pairing broadcast" and enter the pairing state. At this time, you can re-pair with the APP.

3.Restore factory settings

Restore Factory Settings: After 5 consecutive button clicks in the power-on state, the device will play a “short chord tone”, and the product will be restored to the factory state.

4.Equipment shutdown

Press and hold the button for 3 seconds in the power-on state, and release the button to turn off the device when you hear a “drop” sound.

FQA

1.When can the device be located by other iPhone?

When the device is disconnected from the owner's iPhone for a period of time, the device can start to be located by other iPhones, and the owner can start to obtain the location of the device.

2.How to prevent the device from being used for malicious tracking?

When someone else's device sneaks into your belongings and is tracked for longer than a period of time, you will be notified in two ways:

- ① If you have an Apple device such as iPhone, iPad, or iPod touch, you will get a reminder on the Apple device; this function is available on Apple devices with iOS or iPadOS 14.5 and later.
- ② If you don't have an Apple device, if someone else's Locator Tag leaves its owner and has been following you for a while, it will play music to remind you when it moves. Of course, don't worry if you happen to have a friend with you, or a lot of people on the subway you're taking. Because as long as the device does not leave the owner's side, such a reminder will not be triggered.

3.How to protect my privacy?

Where your device is, only you can see it. Your location data and history will never be stored in

Apple's

and MOYAGOA's servers. Devices passing your device's location data remain anonymous at all times, too, and location data is encrypted every step of the way. As a result, neither Apple nor MOYAGOA knows where your device is, nor the identity of the device that helped find it.

4.What is the Find My network? And how does it work?

The Apple Find My network provides an easy, secure way to locate compatible personal items on a map using the Find My app on your iPhone, iPad, iPod touch, Mac, or the Find Items app on Apple Watch. Simply pair your compatible product with the Apple Find My app to view it right alongside your Apple devices. If your item ever goes missing, you can put it in Lost Mode to display a message and contact information to anyone who might find it. The Find My network is encrypted and anonymous, so no one else, not even Apple or MOYAGOA , can view its location.

Important tips

When pairing a device with Findmy app, the phone will link to the Apple server. Pairing may fail because of network problems. The following actions are recommended:

- ① Change the phone's network, such as switching between WiFi and mobile network;
- ② Factory reset of the equipment: After 5 consecutive button clicks in the power-on state, the device will play a “short chord tone”, and the product will be restored to the factory state.
- ③ Re pair with the search app;
- ④ Restart phone

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception,which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.

FCC ID: 2BAUM-FM0006

Safety Statement

According to the management method of low-power electric wave radiation motor

Article 12

Without permission, any company, firm or user shall not alter the frequency, increase the power, or change the characteristics and functions of the original design of the certified lower power frequency electric machinery.

Article 14

The application of low power frequency electric machineries shall not affect the navigation safety nor interfere a legal communication, if an interference is found, the service will be suspended until improvement is made and the interference no longer exists. The foregoing legalcom munication refers to the wireless telecom munication operated according to the telecommunications laws and regulations. The low power frequency electric machinery should be able to tolerate the inter ference of the electric wave radiation electric machineries and equipment for legalcom munications or industrial and scientific applications.
