A photograph showing the internal components of a portable electronic device, likely a handheld GPS or rugged PDA. The device is open, revealing a black plastic housing. Inside, there is a green printed circuit board (PCB) with various electronic components, including a large square chip and several smaller components. A blue SIM card is inserted into a slot on the right side of the PCB. A small, rectangular, light-colored component, possibly a battery or a sensor module, is connected to the main PCB by thin wires. The device is resting on a blue surface.
