Sub : CQS290-WW Variant Comparison

CQS290 is an LTE Cat 4 Android smart modules based on Qualcomm QCM2290 chipset with 2G fallback capability. The module is powered by ARM™ Cortex A53 quad-core CPU architecture and built-in Adreno™ 702 GPU that delivers stronger graphics capabilities, better image quality, and excellent battery efficiency.

The CQS290 module is available in different variants tailored for specific regions. CQS290-WW (World Wide) supports global bands.

CQS290-WW - 1/2/3/4/5/7/8/12/13/18/19/20/25/26/28/38/41/66

CQS290-WW comes in 14 different Sub variants as below. The only difference would be the GPS components and eSim.

The testing variant provided is with GPS component.

We declare that there would be no other RF changes.

Variants	GNSS	eSim
CQS290-WW-108GNAN	Yes	No
CQS290-WW-108GNAH	Yes	Yes
CQS290-WW-216GNAN	Yes	No
CQS290-WW-216GNAH	Yes	Yes
CQS290-WW-232GNAN	Yes	No
CQS290-WW-232GNAH	Yes	Yes
CQS290-WW-332GNAN	Yes	No
CQS290-WW-332GNAH	Yes	Yes
CQS290-WW-364GNAN	Yes	No
CQS290-WW-364GNAH	Yes	Yes
CQS290-WW-432GNAN	Yes	No
CQS290-WW-432GNAH	Yes	Yes
CQS290-WW-464GNAN	Yes	No
CQS290-WW-464GNAH	Yes	Yes

We hereby declare that all the information provided are true to our knowledge.

Sincerely,

Tarun Thomas George
