

To whomsoever it may concern

Sub : CQS290-WW & CQS290-NA Variant Comparison

CQS290 is an LTE Cat 4 Android smart module with 2G fallback capability. It offers a rich set of features including USB 2.0 with OTG, Bluetooth 5.0, FM radio, and Wi-Fi 5, making it well-suited for a broad range of IoT and smart device applications. The module is available in global variants with multiple memory configurations and supports multi-constellation GNSS systems such as GPS, BDS, GLONASS, Galileo, QZSS, and SBAS.

The CQS290-NA variant is derived from the CQS290-WW. Both variants share the same main PCB and core architecture.

CQS290-WW supports 1/2/3/4/5/7/8/12/13/18/19/20/25/26/28/38/41/66 , CQS290-NA disable some bands by SW based on CQS290-WW, only supports 2/4/5/7/8/12/13/25/66.
