

# PetCam Quick Start Guide

## 【Product Introduction】

- |                 |                          |
|-----------------|--------------------------|
| 1. Microphone   | 2. Status indicator      |
| 3. Power button | 4. Multi-function button |
| 5. Fill light   | 6. Camera                |

## 【Button Introduction】

### Power button

1. Power On: Press and hold the power button for 3 seconds to power on.
2. Power Off: Press and hold the power button for 3 seconds to power off while the device is on.

### Multi-function button

1. Briefly press the button to switch between WiFi AP Mode and Normal Mode
2. Press and hold the button for 5 seconds to restore factory settings

## 【First Use】

Note: Screens and settings in this manual may vary with software version.

1. Install the PetPogo APP

Download and install the PetPogo app on your smartphone

## 2. Create a User Account (In App)

Tap Login > Register, then follow the prompts to complete registration and activate your account. Registration is available via mobile phone number or email

address.

## 3. Power On Camera

Press and hold the power button for 3 seconds until the camera powers on normally. Once powered on successfully, the orange indicator light on the front of the camera will stay on for 10 seconds.

## 4. Connect to the PetPogo APP

### Recommended Bluetooth Pairing Method

Open the PetPogo APP, tap the "+" icon in the top-right corner, select Add device by

Mode, choose Camera to enter the Bluetooth pairing process, and follow the in-app instructions to complete pairing.

Note:

1. The PetPogo APP will require Wi-Fi permission and Bluetooth permission to proceed with the pairing process. Please grant the required permissions as prompted.
2. Make sure your camera is kept sufficiently close to your smartphone during pairing.

#### 【How to Wear】

1. Lift the back clip, then pull the back clip silicone sleeve **upward along the arrow direction** from the bottom to separate the sleeve from the clip.
2. Thread the pet collar through the gap between the back clip and its silicone sleeve to complete the camera positioning.
3. Reattach the back clip silicone sleeve to its original position.

Note: The width of the pet collar should not exceed 2.5 cm/ 0.98 inch

#### 【Complete Usage Guide for PetCam Functions and Services】

For comprehensive details about the PetCam product, including usage instructions

and feature introductions, kindly refer to the user guide for Device located in the product manual section at the bottom of webpage via the link below or by scanning the QR code

**【Product specifications】**

- Product Model No.: GLMT25A01
- Size: 34\*34\*15mm
- Waterproof: IP67
- Wi-Fi: 2.4GHz; IEEE802.11 b/g/n/ax
- Charging interface: Magnetic Charging
- Battery Capacity: 495mAh (TYP)
- Power Input: DC 5V/1A
- Storage: 8GB built-in storage

**Packing list:**

1. Device \*1 (includes 1 x Back Clip, 1 x Back Clip Silicone Sleeve, and 1 x Shaft Lock)
2. Quick Start Guide \*1
3. Accessories:
  - 2-meter Charging Cable \*1, Back Clip Silicone Sleeve \*1
  - Use with PetPhone: Combined Back Clip Silicone Sleeve \*2, Combined Shaft Lock \*1

**operating environment**

Please do not charge or use this device near a magnetic field to avoid induction

The internal circuit of the device has malfunctioned. During thunderstorm weather, please do not use the device to avoid lightning strikes or other injuries. In places where there are explicit regulations prohibiting the use of wireless devices, please

turn off this device. It is recommended to operate the device within an ambient temperature range of 0°C~Use under +35°C. Do not use this device in environments with excessively high or low temperatures. Do not seal the device or place anything on it Cover the towel and place other items. Do not use the device in a box or case to avoid poor heat dissipation

Cause equipment damage

### **Warning**

Specific Absorption Rate (SAR) refers to the rate at which the body absorbs RF energy. The SAR limit is 1.6 watts per kilogram in countries that set the limit averaged over 1 gram of tissue and 2.0 watts per kilogram in countries that set the limit averaged over 10 grams of tissue. During testing, the device are set to their highest transmission levels in all tested frequency bands, although the SAR is determined at the highest certified power level, the actual SAR level of the device while operating can be well below the maximum value.

### **EU Regulatory conformance**

The device complies with RF specifications and when used with an accessory that contains no metal and that positions the device a minimum of 0.5 cm from the body.

The SAR limit adopted is 2.0W/kg averaged over 10 grams of tissue. The highest SAR value reported for the device when properly worn (SINGAPORE) PTE.LTD.declares that this device is in compliance on the body complies with the limit. Hereby, UCLLOUDLINK with the essential requirements and other relevant provisions of

Directive (RED) 2014/53/EU

### **FCC Regulatory conformance**

For body worn operation, the device complies with FCC RF exposure guidelines and when used with an accessory that contains no metal and that positions the device a minimum of 1.0 cm from the body. The SAR limit adopted by the FCC is 1.6W/kg averaged over 1 gram of tissue. The highest SAR value reported for the device when properly worn on the body complies with the limit. This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause.

Undesired operation. Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the

equipment.

Note: This equipment has been tested and complies with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur during installation. If the device does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is suggested to try to correct the interference by the following measures:--Reorient or relocate the receiving antenna.--Increase the distance between the equipment and receiver. --Connect the equipment to an outlet on a different circuit to the receiver--Consult the manufacturer or an experienced radio/TV technician for help.

Information on the disposal and recycling of the device This symbol (with or without a solid bar) on the device batteries (if included), and/or the packaging, indicates that the device and its electrical accessories (for example, a headset, adapter, or cable) and batteries should not be disposed of as household garbage. These items should not be disposed of as unsorted municipal waste and should be taken to a certified collection point for recycling or proper disposal. For detailed information about device or battery recycling, contact your local city office, household waste disposal service, or retail store. Disposal of the device and batteries (if included) is subject to WEEE Directive Recast (Directive 2012/19/EU) and Battery Directive (Directive 2006/66/EC). The purpose of separating WEEE and batteries from other waste is to minimize the potential environmental impacts and human health risk of any hazardous substances that may be present fire, do not expose to high temperature, be disable after soaking. Do Do not disassemble or modify, do not short-circuit, do not dispose in not squeeze or bump the battery. Do not continue to

use if serious.

### **CAUTION**

disposal of a battery into fire or a hot oven, or mechanically crushing or cutting of a battery, that can result in an explosion; leaving a battery in an extremely high temperature surrounding environment that can result in an explosion or the leakage of Risk of explosion if the battery is replaced by an incorrect type flammable liquid or gas.
