

Product Name: Remote control

Model Name: ITL-F433B

FCC ID: 2BB78-ITL-F433B

As shown in the figure:

1.Fan Off Button: Press to turn the light on or off.

2.Fan Speed Levels: Press the corresponding button to adjust the fan speed.

3.Anti-Theft Mode: Press this button to disable the fan controls and activate anti-theft mode. The motor will shut off, and regardless of whether the light is on or off, it will illuminate for 5 minutes, then turn off for 2 hours, followed by another 5 minutes of illumination. This cycle repeats.

4.Natural Wind Mode: After staying at level 1 for approximately 15 seconds, the fan speed increases to level 6 (ramp-up time about 5 seconds). At level 6, it remains for about 15 seconds before decreasing back to level 1 (ramp-down time about 5 seconds), repeating this cycle.

5.Fan Reversal: Press this button to reverse the fan's direction of operation.

6.Decrease Light Brightness: Press and hold to decrease the light brightness; short press for incremental reduction.

7.Increase Light Brightness: Press and hold to increase the light brightness; short press for incremental increase.

8.Light On/Off Switch: Turn the light on or off.

9.Timer: Set the fan to turn off after the specified duration.

Remote Control Pairing: Within 30 seconds after the controller is restored to power, press and hold the Fan Off button on the remote transmitter for 5 seconds, or until the fan's light flashes. Test the light and fan functions using the remote transmitter to confirm the pairing process is complete.

FCC statement

This device complies with Part 15 of the FCC rules. Operation is subject to the following two conditions:

- 1) This device may not cause interference.
- 2) This device must accept any interference, including interference that may cause undesired operation of the device.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

FCC Radiation Exposure Statement

This device complies with FCC RF radiation exposure limits set forth for an uncontrolled environment.
