

User Manual

As shown in the figure:

1. Power button: Press this button to turn the fan and light on or off.
2. Anti-theft: Press this button to enter anti-theft mode, which turns off the motor. Regardless of whether the light is on or off, it will illuminate for 5 minutes and then turn off. After 2 hours, it will light up again for 5 minutes, repeating this cycle continuously.
3. Fan speed: Press the corresponding fan speed button to control the fan's rotation speed.
4. Fan Reverse/Forward Rotation: Press this button to switch the fan's rotation direction to reverse mode.
5. Natural Wind: . Stay at 1st gear for approximately 15 seconds, then shift to 6th gear (the ascent time is about 5 seconds). Note for 6th gear: Stay at 1st gear for about 15 seconds, then descend to 1st gear (the descent time is about 5 seconds) and repeat this cycle.
6. Dimming of light intensity: Short press, long press to reduce light intensity.
7. Light Switch Button: Press briefly to turn on the light.
8. Increase in light brightness: Short press, long press to increase light brightness.
9. Reducing light color temperature: Press and hold the light color temperature reduction button.
10. Light-off Button: Press briefly to turn off the light.
11. Increase in light color temperature: Press and hold to increase the light color temperature.
12. Timing: Turn off the fan at the specified time.

Remote control pairing: After the controller is restored to power, within 30 seconds, press and hold the fan-off button on the remote control transmitter for 5 seconds or until the light on the fan blinks. Use the remote control transmitter to test the light and fan functions, and confirm that the learning process is complete.

FCC Statement

This device complies with Part 15 of the FCC rules. Operation is subject to the following two conditions:

- 1) This device may not cause harmful interference.
- 2) This device must accept any interference, including interference that may cause undesired operation of the device.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

FCC Radiation Exposure Statement

This device complies with FCC RF radiation exposure limits set forth for an uncontrolled environment.
