

Using The App

You can use the wifi car app to control your vehicle with your smartphone and to take photos and videos with your vehicle's built-in camera.

To download the app, scan the QR code below or find “wifi-car” in the Apple App Store or “wifi car” in the Google Play Store.

On your mobile phone, find the Wi-Fi Settings menu. Select the network labeled “HDXXXXXXXX” to sync your vehicle with your phone. The Wi-Fi name may be different depending on your model.

Once your phone is connected to your vehicle's Wi-Fi signal, run the app.

Refer to the app instructions for use, or see the screenshots below. Depending on the version of the app, instructions in this manual may differ as the application continues to get updates and improvements.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference
- (2) this device must accept any interference received, including interference that may cause unde operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

FCC Radiation Exposure Statement

This device meets the FCC requirements for RF exposure. The device is designed for normal indoor use and complies with applicable FCC exposure limits.

This equipment should be installed and operated with minimum distance 20cm between the radiator & your body
