Output power of port C:10W

Ambient light power: 3W

Package Contents

1*Wireless Charger

1*Charging Adapter

2*Type-C Cable

1*User Manual

Precautions

- Only charge compatible devices to avoid damage.
- Do not place metal objects or magnetic cards in the wireless charging area.
- Do not use non-MagSafe AirPods cases or incompatible smartwatch models.
- Avoid contact with liquids, high temperatures, or direct sunlight.
- Use a 9V 3A PD protocol charger; low-power chargers may result in slow or no charging.

-Ensure no foreign objects are on the back of the charging device, as they may prevent charging.

Common Issues

Solution for Charging Failure

- Ensure the charger is connected to a 9V/3A PD protocol adapter.
- Check that the device is properly aligned and remove any thick or incompatible protective cases.

- Ensure there are no foreign objects in the charging area.
 - Check that the correct input port is used on the back of the charger.
- **Solution for Slow Charging****
- Confirm that a 9V/3A PD adapter is being used.
 - Ensure the device is centered in the charging area; excessive coil misalignment can result in slow charging.
 - Check if the charging cable is damaged or unable to carry sufficient current.
- **Solution for RGB Lights Not Working****
- Confirm the charger is powered on.
 - Tap the button to activate the lights.
