

BLADER PRO User Guide

Interface Description

- **Port ①:** USB connection to console
- **Port ②:** Extra power input (use when power supply is insufficient)
- **Port ③:** 3.5mm headset jack
- **Port ④:** Keyboard/Mouse port
- **Port ⑤:** Keyboard/Mouse port
- **Port ⑥:** Original controller connection port

Indicator Lights

- **L1 Indicator:** Mode status light
 - Flashing white: Not connected
 - Solid red: Connected to Switch

- Solid blue: Connected to PS4
- Solid green: Connected to Xbox
- **L2 Indicator:** Turbo (rapid-fire) indicator
 - Solid on: Turbo enabled
 - Fast flashing: Turbo active

1. App Download

Scan the QR code and select the corresponding product to download the app.

2. Connection Guide

3.1 Connect to PS4

1. Plug port ① of the BLADER PRO into the USB port of the PS4 console.
2. Connect the original PS4 controller to port ⑥ (controller port). When the L1 indicator shows a solid blue light, the connection is successful.
3. Connect the keyboard and mouse to ports ④ and ⑤. If using a 3.5mm headset, connect it to port ③.
4. After successful connection, download and open the app. Use the app to scan and connect to the device via Bluetooth to adjust settings.

If connection fails (white light flashing), try the following:

1. Ensure the PS4 is set to **USB wired connection mode** in system settings.
2. Replug the controller cable.
3. Turn off the controller and reconnect it to the BLADER PRO.
4. Try a different USB port on the console.
5. Make sure the controller is an official original controller.
6. Try a different controller data cable.

If the issue persists, please contact support via Discord:

3.2 Connect to Nintendo Switch

Note: Enable “**Pro Controller Wired Communication**” in:

Settings → Controllers and Sensors → Turn ON

Connection Methods:

1. **Dock mode:** Plug port ① into the USB port of the Switch dock.
2. **Handheld mode:** Use an OTG adapter connected to the Switch Type-C port, then connect port ① to the OTG adapter.

Steps:

1. Download the app. In the connection interface, select Switch mode and wait a few seconds, or manually switch to Switch mode in device settings. When the L1 indicator shows a solid red light, the connection is successful.
2. Connect keyboard and mouse to ports ④ and ⑤. If needed, connect a 3.5mm headset to port ③.

If connection fails (white light flashing), try:

1. Check if **Pro Controller Wired Communication** is enabled.
2. Replug the USB connection.
3. Switch to Switch mode in the app before connecting.
4. Restart the Switch console.
5. Test with a Pro Controller to check if the Type-C port is functioning properly.

3.3 Connect to Xbox One / Xbox Series S / Xbox Series X

1. Plug port ① into the console.
2. Connect the original Xbox controller to port ⑥. When the L1 indicator shows a solid green light, the connection is successful.
3. Connect keyboard and mouse to ports ④ and ⑤. If needed, connect a 3.5mm headset to port ③.
4. Download and open the app, then connect via Bluetooth to adjust settings.

If connection fails (white light flashing), try:

1. Replug the controller cable.
2. Turn off the controller and reconnect.
3. Try a different USB port.
4. Ensure the controller is an official original controller.
5. Update the controller firmware to the latest version.
6. Try a different data cable.

If the issue persists, contact support via Discord:

3.4 Connect to Xbox 360

1. Plug port ① into the Xbox 360 console.
2. Connect the original Xbox 360 controller to port ⑥. When the L1 indicator shows a solid green light, the connection is successful.
3. Connect keyboard and mouse to ports ④ and ⑤. If needed, connect a 3.5mm headset to port ③.
4. Use the app via Bluetooth to adjust settings.

If connection fails (white light flashing), try:

1. Replug the controller cable.
2. Try a different USB port of the console.
3. Ensure the controller is an official original controller.

If the issue persists, contact support via Discord:

<https://discord.com/invite/KarqS99Jfe>

3.5 Connect to PC

1. Plug port ① into the PC. When the L1 indicator shows a solid green light, the connection is successful.
2. Connect keyboard and mouse to ports ④ and ⑤. If needed, connect a 3.5mm headset to port ③.
3. Download and open the app, then connect via Bluetooth to adjust settings.

If connection fails (white light flashing), try:

1. Replug the BLADER PRO and restart the PC.
2. Update the PC's X360 driver.

3. Try a different USB port of the PC.

If the issue persists, contact support via Discord:

FCC WARNING

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction
