

L1 Light: Guide Mode Indicator

- Blue: PS series (PlayStation) successfully connected.
- Green: Xbox series successfully connected.
- Red: Nintendo Switch (NS) successfully connected.

LED Indicator Lights

Explanation

Settings on the NS/NS2

Go to Switch "System Settings > Controller and Sensors > Pro controller Wired Connection", and adjust it to the "ON" state

NS Connection Diagram

1 Device Connection :

Using the Dock: Connect the AX360's Type-C port (①) to the Switch dock using a data cable.

Not Using the Dock: Connect an OTG adapter to the Switch's bottom Type-C port. Then connect the AX360's Type-C port (①) to the OTG adapter using a data cable.

2 App Connection :

Download the app, select "Switch" on the console connection screen, and wait a few seconds. Then follow the on-screen instructions to switch to Switch mode. Alternatively, you can set the default mode to Switch in the device information section of the app. When the L5 indicator turns solid red, the connection is successful.

3 Peripheral Connections:

Connect the keyboard and mouse to ports ④ & ⑥. For a 3.5mm headphone connection, use port ③.

4 Troubleshooting:

If connection fails, check the app's [connection steps] for troubleshooting solutions.

Settings on the PS4 (PS3: Skip this setting)

Go to “Settings > Devices > Controllers > Communication Method > Use USB cable”

PS3/PS4 Connection Steps

- 1 Use a data cable to connect Port ① (Type-c) to the PS3/PS4
- 2 Connect the original PS3/PS4 controller to Port ② (Controller Port). The L5 log light will turn solid blue upon successful connection.
- 3 Connect the keyboard and mouse to Ports ④ & ⑥. If using a 3.5mm headphone, connect it to Port ③
- 4 Download and open the GEEKVICE app, scan to connect via Bluetooth for parameter adjustments.
- 5 If connection issues occur, refer to the troubleshooting steps in the app.
- 6 If the issue persists, please join our Discord to contact customer support.

XBOX Connection Diagram

- 1 Use a data cable to connect Port ① (Type-c) to the XBOX 360/XONE/XSS.
- 2 Connect the original Xbox 360 controller to Port ② (Controller Port). The L5 light will turn solid green upon successful connection.
- 3 Connect the keyboard and mouse to Ports ④ & ⑥. If using a 3.5mm headphone, connect it to Port ③.
- 4 Download and open the GEEKVICE app, scan to connect via Bluetooth for parameter adjustments.
- 5 If connection issues occur, refer to the troubleshooting steps in the app.

FCC Statement

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

Reorient or relocate the receiving antenna.

Increase the separation between the equipment and receiver.

Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

Consult the dealer or an experienced radio/TV technician for help.

To maintain compliance with FCC's RF Exposure guidelines, This equipment should be installed and operated with minimum 20cm distance between the radiator and your body: Use only the supplied antenna
