INSTRUCTIONS PERTAINING TO RISK OF FIRE OR ELECTRIC SHOCK

IMPORTANT SAFETY INSTRUCTIONS

WARNING:

When using this product, basic precautions should always be followed, including the following:

- a) Read all the instructions before using the product.
- b) To reduce the risk of injury, close supervision is necessary when the product is used near children.
- c) Do not put fingers or hands into the product.
- d) Do not use this product if the flexible power cord or output cable is frayed, has broken insulation, or any other signs of damage.
- e) This equipment is not intended to be used at ambient temperatures less than -4°F (-20°C) or above ambient temperatures of 104°F (40°C).
- g) The battery is intended to be charged when the ambient temperature is between 32°F (0°C) and 104°F (40°C). Never charge the battery when ambient temperatures are outside this range.

SAVE THESE INSTRUCTIONS FOR FUTURE REFERENCE.

RIDER HEIGHT GUIDE

**Not less than
one inch
clearance**

THERE MUST BE AT LEAST 1 INCH OF CLEARANCE BETWEEN THE TOP TUBE AND THE CROTCH OF THE INTENDED RIDER WHILE STANDING WITH ONE LEG ON EACH SIDE OF THE BICYCLE. IF THERE IS LESS THAN 1 INCH CLEARANCE, THE BICYCLE IS TOO LARGE FOR THE RIDER AND SHOULD NOT BE USED.

Quick-Release Skewer x1

Front Fender x1

Saddle x1

Rear Rack x1

Left Pedal x1
Right Pedal x1

Toolkit x1

Battery Key x2

Zip Tie x2

Bicycle Pump x1

Charger x1

User Manual x1
Safety Instructions x1

ASSEMBLY

Assembly requires two people for safety and ease.

STEP 1: Install the Stem

1. Place the e-bike on a level surface stably, then remove the wood strip secured to the steerer tube and seat tube.

2. Remove the spacer from the steerer tube, then slide the stem onto the steerer tube with the handlebar clamp facing forward as shown below.

3. Adjust the stem so that it is perpendicular to the fork crown.

4. While keeping the steerer tube centered in the head tube, tighten the long stem bolt and pinch bolts.

STEP 2: Install the Handlebar

1. Remove the faceplate of the handlebar clamp.

NOTE: All four bolts must be removed. Otherwise, the handlebar cannot be positioned into the clamp.

2. Place the handlebar into the clamp and the faceplate over the front of the handlebar, and tighten the bolts in an X pattern.

3. Ensure the faceplate bolts are tightened evenly, i.e., the gap between the stem and the faceplate should typically be even on the top and bottom.

STEP 3: Adjust the Bell, Reflector, Display, & Brake Levers

1. Adjust the bell so that its body does not touch the gear shifter.

2. The reflector has two adjusting screws, allowing you to adjust its position and angle freely.

3. Adjust the display, brake levers, and gear shifter to the desired angle, then tighten the screws.

STEP 4: Install the Headlight & Front Fender

1. Remove the bolt and nut from the fork arch.

2. Pass the bolt through the bracket holes of the headlight and front fender and the mounting hole on the fork arch, then tighten the bolt and nut.

3. Remove the front fender stay mounting bolts from both fork legs.

4. Pass the bolts through the fender stay eyelets, then tighten the bolts firmly.

STEP 5: Install the Front Disc Brake Caliper

1. Remove the two mounting bolts from the brake caliper.

2. Attach the brake caliper to its mount on the left fork leg, align the mounting holes, and tighten the bolts firmly.

STEP 6: Install the Front Wheel

1. Remove the front wheel axle protectors on both sides.

2. Remove the nut and spring from the quick-release skewer.
