Q.Device cannot find the Headset in the Bluetooth list.

1.Ensure that your headset is fully charged and in pairing mode, and that it is not automatically connected to another device.
2.Disable other Bluetooth devices that may interfere with the connection, or change the usage environment,
3. Check your device for software updates and install them if available.
4. Turn off the Bluetooth function on the device, and then turn it on again to search for devices.

Q.Headset cannot be charged.

1.Clean the charging contacts and the mesh earbuds with an alcohol pad to remove any dust or earwax that might interfere with charging or volume.
2.Clean the charging pins inside the charging case with an alcohol pad and check for normal elasticity, deformation, or color change.
3.If the above steps show no issues, place the headset in the charging case to check the magnetic attraction.

4.Finally, connect the charging case to power (with the headset inside) and verify that the headset' s indicator light turns red and the charging case' s LED display shows the charging status.

Q.No sounds from the headset.

1.Ensure the headset is paired and connected to your device.
2.Ensure that the call selects G8 ,not the phone speaker.
3.Check if the mute button was accidentally pressed during the call.

If you have any questions,please contact customer service through Amazon at any time.

Tips

1.Low battery may cause disconnection. To ensure normal use, please charge the headset promptly.
2.If the headset fails to turn on, try charging it first. Once fully charged, attempt to turn it on again.
3.If the battery is depleted or the headset has been unused for an extended period, the indicator light may not illuminate initially when charging. However, it should normally turn red after a few minutes.
4.Adjust the volume control to a low setting before placing the headset on your ears.
5.When using the headset while walking, be vigilant about the surrounding traffic to avoid traffic accidents.
6.To safeguard your hearing, avoid turning the volume up excessively.
7.If the product falls into flammable substances or liquids like water, cease using it immediately and contact the store where you purchased it or us. Continued use may lead to fire, malfunction, or electric shock.
8.Opening the inside may cause malfunction or electric shock. Do not touch the internal components. Additionally, we do not guarantee the performance if the device has been modified internally by anyone.
9.Avoid charging the device with wet hands or touching the charging port to prevent electric shock.
10.Stop using the product immediately if you feel unwell while using it.

11.If you use a medical device like a pacemaker, consult your doctor before using this product.
12.Do not let small children use this product.

Warning

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

--Reorient or relocate the receiving antenna.

-- Increase the separation between the equipment and receiver

--Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

--Consult the dealer or an experienced radio/TV technician for help

NOTE: This device and its antenna(s) must not be co-located or operation in conjunction with any other antenna or transmitter

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
