

Note: The EUT position is too small to reflect the information of the Label, so the Label will be reflected in the User Manual & Outer Packaging as shown in the position diagram below. (Reflected on page 12 of the user manual, and the label will also be reflected on the outer packaging)

Charging Earphone Case

1. Connect the Type-C cable to the Type-C port on the earphone case.
2. Plug the charging cable into a USB port on your computer, or use a commercially available USB-compatible power adapter and connect it to a power outlet.

- When the earphone battery drops below 20%, a voice prompt will say, "Battery is Low, Please Charge."
- When the charging case battery is below 10%, the LCD screen will display a red battery icon.

FCC ID: 2BBOA-T24

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) This device must accept any interference received, including interference that may cause undesired operation.

(This label will also be reflected on the product packaging box)
