

GPS Tracker Terminal

Quick

Installation

User

Manual

(Version V1.2)

Thank you very much for using GPS TRACKER, the user manual will guide how to operate this product, please read it carefully before using it in order to get the correct method of operation. If the appearance, color and accessories of this product are modified, please refer to the actual product. The manufacturer is not liable for faults and omissions which in the user manual.

1.Product functions & Parameters

1.1 Product functions

Location inquiry, geo-fence, vibration alarm, over-speed alarm, historical route playback, drop off alert.

1.2 Parameters

Content	Specs.
Network	LTE /GSM
Working voltage	DC 3.4V - 4.5V
Working current	4V/65mA
Standby current	4V/8mA
Sleep current	4V/3mA
LTE chip	Simcom
GPS chip	MT2503
GPS sensitivity	-159dBm
GPS accuracy	5m
Time To First Fix	Cold status 35-80s Warm status 35s Hot status 1s
Wall charger	110—220V input 5V output
Storage Temp.	-40 ℃ to +85 ℃
Operation Temp.	-20 ℃ to +55 ℃
Humidity	5%--95% non-condensing

2.Product accessories and LED light status

2.1 Product accessories

Standard: the device/ charging cable / quick installation user manual / double-sided stickers

Optional: powerful magnetic

2.2 Device LED light status

2.2.1 Red LED (Power supply/Charging indicator)

Light status	Meaning
solid	charging
off	Finished/not charging/Power off

2.2.2 Yellow LED(GSM signal)

Light status	Meaning
blink	GSM initialization
solid	GPRS normal communication/online
off	GSM sleep/power off

2.2.3 Blue LED (GPS signal)

Light status	Meaning
blink	GPS signal searching
solid	GPS location finished
off	GPS sleep/power off

3.Installation instructions

3.1 Preparation before installation,

3.1.1 Open the box and check whether the device and the accessories are complete, otherwise please contact your dealer.

3.1.2 SIM card selection, the device works with Micro SIM card, and support full Netcom band.

3.1.3 SIM card installation, there is a small back cover on one side of the terminal, push out the small back cover, pick up the metal cover of the SIM card slot, put the SIM card chip down into the card slot, and cover the metal cover of the card slot.

Note: 1) Before installing or removing the SIM card, please switch off the device;

2) Should activate the GPRS function of the SIM card;

3) Should activate the caller ID function; (activate or not according to the functions you chose.)

4) If your SIM card required you to input the SIM PIN, please refer to your mobile phone user manual to turn off the SIM PIN function.

5) Please ensure that the SIM card is valid.

3.2 Installation

We recommend a hidden installation, and we suggest that you ask a professional organization designated by the dealer. Please note the following:

3.2.1 Hidden installation, pay attention to waterproof;

3.2.2 Do not put together with the launch source, such as reversing radar, anti-theft device or other in-vehicle communication equipment;

3.2.3 GSM antenna and GPRS antenna were built-in the device, make sure that the GPS receiving surface (GPS antenna surface without label) is upward (toward the sky), and there is no metal shielding on the top.

Recommended installation location:

1) Inside the decorative frame under the front windshield of the car;

2) Areas around the front dashboard of the car (non-metallic material surface);

3) Under the decorative plate of the rear windshield of the car;

4) Inside the car door or the middle column;

5) Inside the instrument panel or under the rear seat of the electric bicycle/motorcycle

4. Proper use of the product: Installation → Switch on → Settings →

Register

Installation: When installing, the GPS antenna surface should face the sky. There should be no electromagnetic wave absorber (such as metal or explosion-proof film).

Switch on: Insert the SIM card with right direction, connect the cable according to the wiring diagram, and then switch on the device.

Register platform account: The registration method varies according to the dealer's platform, please consult the dealer.

5. SMS commands and instructions:

Send SMS command from user's SIM card number to the SIM card number which inside the GPS device.

The commands in the following SMS command list are in English input format, and the letters are case-sensitive according to the instruction requirements.

Common inquiry	SMS command format	Device reply
Center number setting	101#13712345678#	OK
Device status query	CXZT	Version, ID, IP, etc...
Chinese address inquiry	123	Chinese address
Latitude and longitude link query	G1234	Google map link
Reset the device	CQ	system reset OK!
Restart GPS	CQGPS	GPS reset OK!
Restore factory settings	FORMAT	OK
APN setting	apn123456 cmnet	SET APN OK
APN user name	apnuser123456 user	SET APNUSER OK
APN password	apnpasswd123456 password	SET APNPASS OK
ignition/motion upload interval	freq,123456,20	OK
Revise Server IP	IP+blank+IP+blank+port Example: IP 106.3.230.234 8185	set IP OK

6. App operation

Login location service platform

Users can login to the global positioning service platform provided by the dealer, to check the location and status of the vehicle, and perform corresponding operations. Please consult your dealer for the service platform website.

Platform login on computer:

For individual users, please login with the device ID number. The ID number is on the device body and also on the package box. When logging in to the platform, please select IEIM/License number to log in. The default password is: 123456

Enterprise users and fleet users please select the username to log in. User name and password are set by the dealer, please contact your dealer for distribution!

Android APP download, please scan the QR code on the computer, and if Apple mobile phone, please search the APP name in the App store.

6.1 Login page operation introduction

Login and add the device into the device list, then you enter the app home page, users can check battery level, location time, motion status, motion direction, speed, address resolution and other information of the device. Click on “Real Time Tracking”, “Historical route” etc...

6.2 Real-time tracking operation introduction

6.3 Real-time monitoring,

Click the “Real-time Tracking” icon to enter the corresponding page, then can check the vehicle running status, driving route, speed, direction and other information in real time.

Historical route: Playback of the historical route of the device on a certain day or a period of time (suggest no more than 7 days, otherwise the amount of data loaded will be too large)

Click "Select Date" to pop up the calendar: IOS long press on the calendar to enter the multi-day selection mode and that day is the start date, press and hold another day as the end date to view the historical track during the period; Android click and select the range and click on the right

6.4 Introduction of commands

1)Vibration alarm on: if this command sent successfully, if there are vibration, will receive alarm message.

2)Vibration alarm off: Turn off the vibration alarm function.

3) Main control number: Receive alarm call, alarm SMS.

4) SOS number: Receive SOS call, if the device support.

5)Pass-through: Send SMS commands through the APP.

6)Smart mode: upload data according to the pre-set time interval, other time does not work, device will not upload position even though vibration.

7) Normal mode: if there is vibration or movement, the data is uploaded every 30 seconds (default). Without vibration or movement, the device automatically enters into the power saving mode, the GPS is turned off, and the device is not offline.

8)Power saving mode: no vibration or movement, the device automatically enters into the power saving mode, turns off GPS and GPRS, and the device is offline.

9)Voice control recording: no

10)Simultaneous Location: no

11)Upload interval: Set the working status upload interval (unit: second), the default interval is 60 seconds.

12)Restart remotely: The device will restart automatically after clicking the command.

13)Remote shutdown: no

7.Trouble shooting

If the device can't be connected to the background server after first time installation, and the background server shows it is offline, please check the installation correct or not.

If you have any questions for the operation, please refer to the following questions and solutions; if you still can't solve the problem, please contact your dealer.

Common Problems	Reasons	Solutions
Poor signal	Test at areas where there are high buildings or underground parking lots, where radio waves cannot be sent or received normally.	Use it at a good signal place
platform shows device not activated after first installation	Main power supply connected correct or not	Do not connect to the main control line of the vehicle
	SIM inserted not correct	Check the SIM card
	LED status	Check if the indicator is blinking or steady
	SIM without GPRS activated or SIM card out of charge.	Please contact carrier to activate GPRS or charge
Platform map shows incorrect location	GPS no location	Please go to outdoor place where GPS signal good
	Vehicle did not move after installation	Please drive the vehicle on the road
	ACC connected or not	Connect the device and turn on ACC
Platform shows the main power disconnect	Poor power supply connection	Check whether the power supply line of the device connected correct or not
Platform shows device offline	SIM card out of charge of GPRS was canceled	Please check your SIM card
	Weak signal area	Please try again at good signal area

FCC Warning:

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Caution: Any changes or modifications to this device not explicitly approved by manufacturer could void your authority to operate this equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator and your body.
