MINI WIRELESS SPEAKER

Including: 1 speaker, 1 Type-C charging cable, instruction manual

USER MANUAL

FRONT

Operating Instructions for the Product

Touch the power button for 3-5 seconds, and there will be a voice prompt for power on or off. If it cannot be turned on normally, please check the battery level. Use a 5V charger to connect the attached data cable of the unit for charging.
After powering on, turn on your mobile phone or other Bluetooth devices, select the pairing name "PY-WMINIS" of this unit, and connect via Bluetooth to play audio. The speaker will automatically reconnect to this mobile phone or Bluetooth device when powered on next time.
Indicator light status:
Blue light flashing quickly after power on — Searching for Bluetooth signals
Blue light staying on — Connection successful
Blue light flashing slowly — Speaker entering playback mode
Red indicator light — Charging; the red light turns off when fully charged

Pairing Two Speakers

Two speakers of the same model are required. Before pairing, ensure that both speakers are not connected to other Bluetooth devices (if already connected, disconnect Bluetooth on the mobile phone or device). Keep both speakers powered on (with indicator lights flashing quickly). Tap the power button of one speaker twice continuously, and the two speakers will automatically pair. A music prompt will sound when pairing is successful.
At this time, turn on your mobile phone's Bluetooth, search for and connect to the Bluetooth model of one of the speakers. Both speakers will then play audio simultaneously with left and right channels. Controlling either speaker will make both speakers execute the same command.
Speakers that have been paired once will automatically reconnect when powered on next time. Tap the power button twice continuously to disconnect the two paired speakers.

BACK

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.
Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.
NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.
If this equipment does cause harmful interference to radio or television reception which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
--Reorient or relocate the receiving antenna.
-- Increase the separation between the equipment and receiver
--Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
--Consult the dealer or an experienced radio/TV technician for help
NOTE: This device and its antenna(s) must not be co-located or operation in conjunction with any other antenna or transmitter
The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
