How to use it correctly

1. This product is suitable for indoor scenes, "not waterproof" please avoid outdoor installation .
2. It should be installed in a ventilated environment as much as possible to avoid unstable factors caused by long-term closed high temperature replacement.
3. The camera and the router should be controlled within 10 meters of the partition wall, and the open environment should be kept within 20 meters.
4. When using at night, do not place items in front of the camera lens and do not face the wall, glass window, mirror, etc., so as not to block the reflection of infrared rays and affect the image quality.
5. The installation area should be away from high power equipment to avoid signal interference and affect the use experience.

Q1: What should I do if WiFi configuration failed?

A1: Make sure GPS Location service is on and "Allow" is selected for all app permissions;
Check the WiFi password is entered correctly, no more than 31 digits, and letter case;
After all steps above completed, check router settings, such as: "Blacklist", "Firewall", "Device Internet restrictions", etc.

Q2: How to do if the camera is offline always?

A2: Please check connecton of the camera adapter and socket, or replace the power supply.
Check the wifi signal strength, make camera closer to router.

Q3: How could multiple users view at the same time?

A3: Please use share funtion to other users.

FCC Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

-- Reorient or relocate the receiving antenna.

-- Increase the separation between the equipment and receiver.

-- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

-- Consult the dealer or an experienced radio/TV technician for help.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator & your body.
