

GETTING STARTED

1. Push and hold the Control knob until the LED turns to a slow blue pulse.
2. Select **MILTON A.N.C.** from your sound device's Bluetooth® list.
3. Download the Marshall app and follow the in-app instructions to complete the setup.

1 CUSTOMISABLE M-BUTTON

Push and hold the M-button to get the music started with Spotify Tap. A short press toggles ANC modes (noise cancelling and transparency). The action for the short press can be customised in the Marshall app.

2 CONTROL KNOB

Use the multidirectional Control knob to control your music, phone calls and more. Push and hold for 1 second to turn the headphones on or off.

3 LED INDICATOR

The LED shows the battery level while charging, red through orange to green (0–100%). It pulses blue while in Bluetooth pairing mode and white while searching for a device. The LED is steady white when connected.

4 USB-C CHARGING AND AUDIO INPUT

Charge the headphones by plugging in a USB power source via the included USB-C to USB-C charging cable. The USB-C port can also be used as an audio input. Turn on the headphones and connect the included USB-C to 3.5 mm audio cable to a sound device's output jack for analog audio playback. Alternatively, use the optional USB-C to USB-C digital audio cable (sold separately).

Download the Marshall app to get the most out of your headphones. The full user manual is available in the app or at marshall.com
