Mechanical Keyboard

- ① Keyboard indicator light
- ② Receiver storage compartment
- ③ USB-C interface
- ④ Mode switch BT/wired/2.4G
- ⑤ RGB ambient light bar and battery indicator

- Stylish appearance design, 108 key layout, gasket structure, PCB single key slot, delicate and soft touch.
- The keycaps and mechanical switches can be plugged in and unplugged, and users can also purchase various brands of switches and personalized keycaps on the market for free DIY.
- The keyboard is made of solid materials and has sensitive key response.
- Independent storage receiver.
- Humanized keyboard design, combined with Fn to add a series of commonly used shortcut function keys.
- Both keyboard BT/2.4G/wired support full key no collision.

① Switch to **【wired】** mode

② Insert the USB-C end of the standard USB cable into the corresponding port of the keyboard

③ Simply insert one end of the USB cable into the computer's USB port

Power on/off instructions

- Turn the switch to wired (without USB power), the keyboard will be turned off, and the built-in battery will stop supplying power to the keyboard.

2.4G Connection Instructions

① Switch to **【2.4G】** mode

② Remove from the slot in the upper left corner of the key **【USB receiver】**

③ Simply plug it into the USB port of the computer to use

Combination key for fast 2.4G code matching

- **Manual code matching:** Press and hold the combination key "FN+~" for about 3 seconds, and the green light will flash to enter the code matching state. At this time, insert the receiver into the USB port of the computer, and the blue light of the ~ key will light up for 2 seconds. The 2.4G connection is successful. At this point, the code matching is completed.

Attention: When connecting to 2.4G, search first and then plug in the receiver. The factory default code has been matched.

Combination key for quick device switching:

- Short press the combination key Fn+numbers 1, 2, or 3, and the blue light will flash, indicating that the keyboard has entered pairing or search mode, and can be paired and connected in the device. In the reconnection state, the blue light will light up for 2 seconds.
- Press Fn+number keys 1, 2, or 3 to switch devices.

Backlight effect adjustment

FN+\ combination key switches between 15 RGB lighting effects and turns off a total of 16 lighting effects:				
Adrift (Restore default rear lighting effect)	As the shadow follows the form	Sinusoidal light wave	Pinwheel	Rainbow Waterfall
Rich and honored, being in full flower	Game pattern	Off Mode	Constant light mode	Breathing pattern
DrEaM RainBoW	Be touch-and-go	Strolling in the Rain	Button ripples	Was studded with stars
A continuous flow				

- Cooperate with the driver to create music rhythm RGB lighting effects, which have 10 lighting modes to choose from.

Intelligent sleep mode description

10

- Wireless pairing time, BT -1 minute/2.4G-20s. If there is no connection or button operation after timeout, it will enter sleep mode.
Return time, BT -20S/2.4G-10S. If there is no connection or button operation after timeout, it will enter sleep mode.
After wireless connection, if there is no button operation for one minute, it will enter sleep mode. After hibernation, click the button to wake up the keyboard.

- Press and hold FN to view:
Current connection mode (2.4G, BT, wired); Current BT channel (channels 1, 2, 3)
Current system mode (Android, Windows, Mac, iOS)
The corresponding buttons above will light up, release to restore the light effect.

- 2.4G mode indicator light="~" key
- Wired mode indicator light="4" key
- BT channel indicator light="1, 2, 3" keys
- System mode indicator light="Q, W, E, R" keys

- Connect the keyboard to the computer via the provided USB cable to charge the keyboard. The RGB ambient light bar can display keyboard battery level FN+B and charging streamer display. Full of continuous green light, with 5 lights each indicating 20% battery life. Low battery all red indicator.
- FN+B enters battery mode. The power mode includes: power display and charging light effect display.
- Press FN+Left Shift to exit battery mode and switch back to the light effect before entering battery mode. FN+B switches to battery mode. Reset or power on again, exit battery mode, and perform normal lighting effects.
- USB-C connectivity is more reliable, performance is more stable, and charging is faster.

 Charging instructions	1. It is recommended to use only the computer USB port to charge the keyboard. 2. Do not use fast-charging cell phone chargers to charge the keyboard. 3. Do not use inferior non-standard power adapter to charge the keyboard. 4. Do not use over-voltage and over-current power adapter to charge the keyboard. 5. Please keep away from high temperature equipment when charging 6. Please turn off the power switch if it is not used for a long time. The above charging instructions also apply to other devices with charging function (keyboard/mouse/headphones/speakers, etc.)

ИНСТРУКЦИЯ ПО ПРИМЕНЕНИЮ

Пожалуйста, прочитайте инструкцию перед первым использованием.

Спасибо за выбор продуктов AULA.

Компьютерные Клавиатура и мышь – основные устройства управления компьютером, предназначены для ввода данных (могут быть проводными или беспроводными (2.4 ГГц с передатчиком в комплекте или Bluetooth без передатчика)).

Компьютерная гарнитура является устройством ввода/вывода данных, предназначена для ввода данных (голоса) посредством микрофона и для вывода данных через наушники. (Могут быть проводными и беспроводными (2.4ГГц, Bluetooth, 2.4ГГц+ Bluetooth)).

Коврик для компьютерной мыши необходим, чтобы обеспечить хорошее сцепление с поверхностью и добиться оптимального скольжения мыши. Коврик устанавливается на поверхности стола, мышь помещается сверху.

Стенд/Подставка для ноутбука/планшета необходима для размещения устройства под удобным углом для работы/игр и дополнительного охлаждения.

Колонки 2.0/2.1 предназначены для воспроизведения музыки и других аудио файлов, подключаются к ПК, ноутбукам, планшетам, смартфонам через разъем 3.5 мм, питаются от USB.

USB хаб - это устройство, позволяющее подключить в 1 порт Type-C ряд устройств, таких как: устройства ввода, накопители памяти, дополнительные мониторы и проводной интернет.

Подробные характеристики товара находятся на сайте www.aulagaming.ru

Подключение:

Аккуратно распакуйте изделие. Разместите на столе, подключите к компьютеру, к свободному порту USB/аудиоразъему (для гарнитур/ колонок) и проверьте работоспособность.

FCC Warning

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
