When & How to Use Metal Ring?

Option 1

For iPhone 15/14/13/12 series with MagSafe case.
No need to use metal rings.

Option 2

For iPhone 15/14/13/12 series with non-official case.
Stick the metal ring on the center of the back of your phone case.

Warm Tips

1. Please use the included QC3.0 vehicle charger adapter to ensure fast charging.
2. If you use regular cases, be sure to use the provided metal ring and align it to the proper place on the outside of the phone case using the included alignment card.

FCC Warning Statement

This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This equipment must be installed and operated with a minimum distance of 20 cm between the radiator and user body.
