

Lambda Instructions

1、 Documentation

This article is an explanatory document for CE certification of Lambda products, and introduces some basic features of the product.

2、 Product information

Product name

Wireless charging module with NFC

3.Product introduction

It is used for wireless charging function, which transmits energy and signals through electromagnetic induction between coils to wirelessly charge mobile phones.

It is used for NFC communication. Through the NFC near field communication protocol, the information interaction between the mobile phone and the car machine is completed, so that the car machine can perform user identification and start the vehicle according to the mobile phone.

Version model

Part number (model): 8891918209

input Output

Normal working voltage: 9-16V

Maximum input current: 3A

Maximum efficiency of wireless charging: $\geq 70\%$

Wireless charging maximum load power: $15W \pm 10\%$

Working Conditions and Status

Working temperature: $-40-85^{\circ}\text{C}$

Working humidity: 0-95%

Foreign object identification: There is a metal foreign object (such as a 1 yuan coin) between the product and the mobile phone. The product passes the FOD detection and automatically turns off the wireless charging until the foreign object is removed.

Communication bus type: CAN bus

Quiescent current: less than or equal to 0.1mA

NFC function: can recognize NFC card/mobile phone

Component description

owning module	Part number	quantity	factory
power module	MP2451	1	MPS
BuckBoost	MPQ4231	1	MPS
Coil selection	DMTH69M8LFVWQ	6	DIODES
Temperature NTC	NCP15XH103F03RC	2	muRata
CAN communication bus	TJA1043T	1	NXP
Master MCU	STM32L431RCT6	1	AutoChip
NFC soc	ST25R3914	1	ST
powerstage	Nu8015	1	NuV
Resonant Cavity Capacitance	CGA5L1C0G2A104J160AE	10	TDK

Warning:

1. Operation temperature: -40~85°C.
2. Operation Frequency: 114.4kHz-127.9 for wireless charging, 13.56±0.7MHz for NFC.
3. Max H-field: 23.24dBμA/m@10m for wireless charging, 18.87 dBμA/m@10m for NFC

Changzhou Tenglong Auto Parts Co.,Ltd. hereby declares that this Wireless charging module with NFC is in compliance with the essential requirements and other relevant provisions of Directive 2014/53/EU.

This information has to be presented in such a way that the user can readily understand it. Typically, this will necessitate translation into every local language (required by national consumer laws) of the markets where the equipment is intended to be sold. Illustrations, pictograms and using international abbreviations for country names may help reduce the need for translation.

EU Declaration of Conformity

We,

Changzhou Tenglong Auto Parts Co.,Ltd. (No.15, Tenglong Road, Economic Development Zone, Wujin District, Changzhou, Jiangsu province, China) hereby declares that this WIRELESS CHARGER is in compliance with the essential requirements and other relevant provisions of Directive 2014/53/EU.

According to Article 10(2) of Directive 2014/53/EU, the Wireless charging module with NFC can be used in Europe without restriction.

FCC WARNING

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

To maintain compliance with FCC's RF Exposure guidelines, This equipment should be installed and operated with minimum distance between 20cm the radiator your body: Use only the supplied antenna.

IC Caution:

This device contains licence-exempt transmitter(s)/receiver(s) that comply with Innovation, Science and Economic Development Canada's licence-exempt RSS(s). Operation is subject to the following two conditions: This device may not cause interference. This device must accept any interference, including interference that may cause undesired operation of the device.

This equipment should be installed and operated with minimum distance between 10cm the radiator your body

L'émetteur/récepteur exempt de licence contenu dans le présent appareil est conforme aux CNR d'Innovation, Sciences et Développement économique Canada applicables aux appareils radio exempts de licence. L'exploitation est autorisée aux deux conditions suivantes : L'appareil ne doit pas produire de brouillage; L'appareil doit accepter tout brouillage radioélectrique subi, même si le brouillage est susceptible d'en compromettre le fonctionnement.

Cet équipement doit être installé et utilisé avec une distance minimale de 10 cm entre le radiateur et votre corps
