Safety and Precautions

1. Wear the watch about a finger's width away from your wrist bone. Wearing it too loosely may affect heart rate and blood oxygen data. When measuring heart rate and blood oxygen on the watch, keep your wrist still during the measurement.
2. The watch has been tested and has demonstrated water and dust resistance under specific conditions. However, it is not a professional waterproof device. The watch can be used during sports (including exposure to sweat), rain, or hand washing.
3. The watch is not resistant to seawater, alkali solvents, chemical reagents, and other corrosive liquids.
4. Use the device within a temperature range of 0°C to 45°C. Operating outside this range may cause device malfunction.
5. Charge the device using the provided charging cable. When using a power adapter for charging, use one rated for 5V output voltage and 1A output current, which meets the required safety standards. Keep the adapter, charging cable, and device dry while charging. Do not touch the adapter and charging cable with wet hands, and ensure they are not exposed to rain or submerged in liquid.
6. The product contains a non-removable lithium battery. Do not replace the battery yourself to avoid damaging the battery or device. Improper battery disposal may lead to explosions.
7. Do not disassemble, impact, squeeze, or throw the device into the fire to avoid explosions. If the battery swells severely, stop using it.
8. Avoid exposing the device to prolonged high temperatures or placing it near heat sources like sunlight, heaters, microwaves, ovens, or water heaters. Overheating of the battery can cause explosions.
9. The device and accessories may contain small parts. Keep them out of reach of children.
10. This device is not a medical device. Any data/information provided by the product should not be used as a basis for diagnosis, treatment, or prevention of diseases.
11. If not using the product for a long time, charge it fully, turn it off, and store in a cool and dry place. Charge it at least once every 3 months.

FCC Warning

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:
(1)This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.
Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.

Specific Absorption Rate (SAR) information:
This product meets the government's requirements for exposure to radio waves. The guidelines are based on standards that were developed by independent scientific organizations through periodic and thorough evaluation of scientific studies. The standards include a substantial safety margin designed to assure the safety of all persons regardless of age or health.
FCC RF Exposure Information and Statement The SAR limit of USA (FCC) is 1.6 W/kg averaged over one gram of tissue. Device types: BS-W2403 (FCC ID: 2BCNP-BS-SWMC) has also been tested against this SAR limit. The highest SAR values for front of face and Wrist-worn accessories are 0.51 W/Kg and 1.05 W/Kg. This device was tested for typical body-worn operations with the product kept 0cm from the body. To maintain compliance with FCC RF exposure requirements, use accessories that maintain a 0cm separation distance between the user's body and the product. The use of belt clips, holsters and similar accessories should not contain metallic components in its assembly.
The use of accessories that do not satisfy these requirements may not comply with FCC RF exposure requirements, and should be avoided. Body-worn Operation
This device was tested for typical body-worn operations. To comply with RF exposure requirements, a minimum separation distance of 0cm must be maintained between the user' s body and the product, including the antenna. Third-party belt-clips, holsters, and similar accessories used by this device should not contain any metallic components.
Body-worn accessories that do not meet these requirements may not comply with RF exposure requirements and should be avoided. Use only the supplied or an approved antenna.
