FCC WARNING

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.
NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

08

Main Data Parameter

Protocol: Wifi (Default)

Rated Operating Voltage Range: 100v-240v

Control Type: Remote Control, Manual

Poles Description: 1P+N (N Pole Pass-through)

Customization: SigMesh/ ZigBee

Model selection: Non-metering Type/Metering Type

Non-metering Type/Metering Type LED Indicator Description

The LED indicator shows a steady blue light, indicating that the device is in ON status.

The LED indicator shows a light out, indicating that the device is in OFF status.

The LED indicator shows blue flashing, indicating that the device is in pairing mode.

03

Third Step:

Click the "+" in the upper right corner, then choose the "Add Device" button to wait discovering devices, then click "Add" button.

Fourth Step:

Enter the wifi account password and click next step, wait for the switch to connect to the network.

06

To maintain compliance with FCC's RF Exposure guidelines, This equipment should be installed and operated with minimum 20cm distance between the radiator and your body: Use only the supplied antenna.
