Tips

- Do not attempt to disassemble or replace any parts inside the product except for the operation method specifically indicated in the manual.
- Do not put the product into water or any other liquid, this product is not designed to be waterproof.
- If any liquid accidentally enters the product, please immediately disconnect and remove the product.
- To avoid electric shock, please make sure there is no water on your hands when installing or uninstalling the product.
- Do not place the product near a heat source or expose it directly to a fire source.
- Do not place this product in an environment where there is a strong electromagnetic force, as this may cause the product to malfunction.
- It is recommended not to operate the device while it is charging.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

FCC warning
Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.
Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates noise and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
-Reorient or relocate the receiving antenna.
-Increase the separation between the equipment and receiver.
-Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
-Consult the dealer or an experienced radio/TV technician for help.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
