

Magic Keyboard

M58/59
Instruction Manual

• Please read this manual carefully before use and keep it properly

Scope of Application

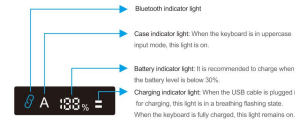

Applicable models: iPad Pro 11 (M2, M3)/Air4/5/6/7
(24 M4 models to be remade later Turn on a shaft with a thickness of less than 1mm)

Machine type	Bluetooth leather case keyboard
connection	Bluetooth transmission (Bluetooth 5.3)
charging port	Type-c
Product features	Keyboard input multi touch gesture
support system	iOS

(Keyboard schematic diagram)

Description of digital display function of toggle switch

Touch Control Keyboard Layout

Function combination key

+	Backlight brightness adjustment	+	Language switch
+	Backlight rainbow transformation	+	Touchpad (on/off)
+	Bluetooth switch		

Product introduction

Product Parameters

Color classification: Iron Grey/Silver
KEY/Number of keys: 78KEY
Battery capacity: 500mA
Working voltage: 3.3V
Working current: <50mA
Bluetooth distance: within 10 meters
Charging current: <250mA
Charging time: <3 hours
Keyboard lifespan: 3 million cycles
Product weight: 610g ± 10g

(Product dimension diagram)

Operating Instructions

After opening the keyboard, pull the iPad onto the stand plate. The iPad will be connected to the keyboard, and the connection indicator light will display green. After closing the keyboard, it will automatically disconnect. When the keyboard is turned on, the iPad will light up and automatically connect.
Press and hold the power button for 3 seconds to turn on the device (press and hold the power button for 3 seconds to turn off the device). After the device is turned on, press and hold the Bluetooth button for 3 seconds to enter the pairing state. The pairing blue light will continue to flash, and after successful pairing, the Bluetooth light will turn off and the battery percentage light will remain on.
When the battery level is less than 30%, the percentage indicator light flashes (once per second), and when it is below 3.3V, the keyboard automatically shuts down. The charging light flashes during charging, and the full charge indicator light remains on when fully charged.
The backlight will turn off after 90 seconds of not using the keyboard, and the keyboard will enter sleep mode after 10 minutes.

Bluetooth connection

- Enable device Bluetooth**
After turning on, the Bluetooth light enters automatic broadcasting mode, the Bluetooth indicator light will flash quickly, and the keyboard will enter Bluetooth pairing mode. Go to "Settings" -> "Bluetooth" on the iPad and make sure the switch is turned on.
- Search and select keyboard**
Find "MAGNET" in the Bluetooth device list, click on the device name, and the Bluetooth keyboard will connect and pair.
- Complete connection**
After a successful Bluetooth connection, the pairing indicator light goes out and the iPad displays "Connected".

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction
