3. Do not use with other power sources to avoid damage to the device.
4. Do not use with other power sources to avoid damage to the device.
5. Do not use with other power sources to avoid damage to the device.
6. Do not use with other power sources to avoid damage to the device.
7. Do not use with other power sources to avoid damage to the device.
8. Do not use with other power sources to avoid damage to the device.
9. Do not use with other power sources to avoid damage to the device.
10. Do not use with other power sources to avoid damage to the device.

Environmental instructions

Do not use in the following environments:

- 1. High temperature environment (above 40°C).
- 2. High humidity environment (above 90% RH).
- 3. High salt environment (above 5% NaCl).
- 4. High dust environment (above 100g/m³).
- 5. High vibration environment (above 10g).
- 6. High shock environment (above 10g).
- 7. High pressure environment (above 100kPa).
- 8. High magnetic field environment (above 100mT).
- 9. High electric field environment (above 100kV/m).
- 10. High radio frequency environment (above 100MHz).
